

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. BACKGROUND AND BASIS OF PREPARATION

Background

Ferrari is among the world's leading luxury brands. The activities of Ferrari N.V. (herein referred to as "Ferrari" or the "Company" and together with its subsidiaries the "Group") are focused on the design, engineering, production and sale of luxury performance sports cars. The cars are designed, engineered and produced in Maranello and Modena, Italy and sold in approximately 60 markets worldwide through a network of 181 authorized dealers operating 195 points of sale. The Ferrari brand is licensed to a selected number of producers and retailers of luxury and lifestyle goods, with Ferrari branded merchandise also sold through a network of 16 Ferrari-owned directly operated stores and 2 franchised stores (as of December 31, 2025), as well as on Ferrari's website. To facilitate the sale of new and pre-owned cars, the Group provides various forms of financing to clients, as well as to dealers in certain territories, directly or through cooperation or other agreements with financial institutions. Ferrari also participates in the Formula 1 World Championship through its Scuderia Ferrari team and the World Endurance Championship through its Ferrari endurance teams. Ferrari's racing activities are a core element of Ferrari marketing and promotional activities, as well as an important source of innovation to support the technological advancement of Ferrari's product portfolio.

Basis of preparation

Authorization of consolidated financial statements and compliance with International Financial Reporting Standards

These consolidated financial statements of Ferrari N.V. were authorized for issuance by the Board of Directors on February 19, 2026.

The consolidated financial statements have been prepared in accordance with the IFRS[®] Accounting Standards ("IFRS Accounting Standards") as issued by the International Accounting Standards Board ("IASB") and IFRS Accounting Standards as adopted by the European Union (references to IFRS Accounting Standards refer to both IFRS Accounting Standards as issued by the IASB and IFRS Accounting Standards as adopted by the European Union, unless specified otherwise). There is no effect on these consolidated financial statements resulting from differences between IFRS Accounting Standards as issued by IASB and IFRS Accounting Standards as adopted by the European Union. The designation IFRS Accounting Standards also includes International Accounting Standards ("IAS[®] Standards") as well as the interpretations of the International Financial Reporting Interpretations Committee ("IFRIC[®] Interpretations" and "SIC[®] Interpretations").

The consolidated financial statements are prepared on a going concern basis and applying the historical cost method, modified as required by IFRS Accounting Standards for the measurement of certain financial instruments, which are generally measured at fair value.

The consolidated financial statements are presented in Euro, which is the functional currency of the Company, and unless otherwise stated amounts are presented in thousands of Euro.

2. MATERIAL ACCOUNTING POLICIES

Format of the financial statements

The consolidated financial statements include the consolidated income statement, consolidated statement of comprehensive income, consolidated statement of financial position, consolidated statement of cash flows, consolidated statement of changes in equity and the accompanying notes (referred to collectively as the "Consolidated Financial Statements").

For presentation of the consolidated income statement, the Group uses a classification based on the function of expenses, as it is more representative of the format used for internal reporting and management purposes and is consistent with international practice. In the consolidated income statement, the Group presents a subtotal for its operating profit before interest and taxes which is referred to as operating profit (EBIT). Operating profit (EBIT) distinguishes between the profit before taxes arising from operating items and those arising from financing activities. Operating profit (EBIT) is one of the

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

primary measures used by the Board of Directors (the Group's "Chief Operating Decision Maker" as defined in IFRS 8 — *Operating Segments*) to assess performance and allocate resources.

For presentation of the consolidated statement of financial position, a mixed format has been selected to present current and non-current assets and liabilities, as permitted by IAS 1 paragraph 60. More specifically, the Consolidated Financial Statements include both industrial and financial services activities. Receivables from financing activities are included in current assets as the investments will be realized in their normal operating cycle. The funding for financial services activities is primarily obtained through securitization programs and funding from certain of the Group's operating companies. This financial service structure within the Group does not allow the separation of financial liabilities funding the financial services operations (whose assets are reported within current assets) and those funding the industrial operations. Presentation of financial liabilities as current or non-current based on their date of maturity would not facilitate a meaningful comparison with financial assets, which are categorized on the basis of their normal operating cycle. Disclosure as to the due date of the various components of debt is provided in Note 24.

The consolidated statement of cash flows is presented using the indirect method with cash flows classified within operating, investing or financing activities.

New amendments effective from January 1, 2025

The following new amendments effective from January 1, 2025 were adopted by the Group for the preparation of these Consolidated Financial Statements.

In August 2023, the IASB issued amendments to IAS 21 — *The Effects of Changes in Foreign Exchange Rates: Lack of Exchangeability*, to clarify how an entity has to apply a consistent approach to assessing whether a currency is exchangeable into another currency and, when it is not, to determine the exchange rate to use and the disclosures to provide. The amendments were effective for the Group from January 1, 2025 and there was no impact from their adoption.

In December 2024, the IASB issued Amendments for nature-dependent electricity contracts which amended *IFRS 9 — Financial Instruments* and *IFRS 7 — Financial Instruments: Disclosures* to help companies better report the financial effects of nature-dependent electricity contracts, which are often structured as power purchase agreements (PPAs), in the light of the increased use of these contracts. The amendments are effective on or after January 1, 2026 and the Group early adopted the amendments starting from the third quarter of 2025 in relation to a power purchase agreement the Group entered into during the period.

New standards and amendments not yet effective

The standards and amendments issued by the IASB that will have mandatory application in 2026 or subsequent years are listed below.

In April 2024, the IASB issued IFRS 18 — *Presentation and Disclosure in Financial Statements*, primarily in response to investors' concerns about comparability and transparency of entities' performance reporting. IFRS 18 replaces IAS 1 — *Presentation of Financial Statements*, carrying forward many of the requirements in IAS 1 unchanged and complementing them with new requirements. In addition, some IAS 1 paragraphs have been moved to IAS 8 — *Accounting Policies, Changes in Accounting Estimates and Errors* and IFRS 7 — *Financial Instruments: Disclosures*. Furthermore, the IASB has made minor amendments to IAS 7 — *Statement of Cash Flows* and IAS 33 — *Earnings Per Share*.

IFRS 18 introduces new requirements to:

- present specified categories and defined subtotals in the statement of profit or loss;
- provide disclosures on management-defined performance measures (MPMs) in the notes to the financial statements, and
- improve aggregation and disaggregation.

IFRS 18 is effective from January 1, 2027. The Group is evaluating the potential impact from the adoption of this standard and performing a detailed assessment to determine the appropriate classification of items to ensure that the operating profit subtotal will comply with the requirements of IFRS 18.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

The Group currently reports various non-GAAP financial measures (also referred to as alternative performance measures) to its investors that may meet the definition of a management-defined performance measure under IFRS 18, including EBITDA, Adjusted EBITDA, Adjusted Operating Profit (Adjusted EBIT), Adjusted Net Profit, Adjusted Basic Earnings per Common Share and Adjusted Diluted Earnings per Common Share. Management-defined performance measures under IFRS 18 require specific disclosures within a note to the financial statements. The Group is performing an assessment of other measures that are currently being reported outside the financial information to determine whether or not they meet the definition of a management-defined performance measure.

In May 2024, the IASB issued IFRS 19 — *Subsidiaries without Public Accountability: Disclosures*, which permits eligible subsidiaries to use IFRS Accounting Standards with reduced disclosures better suited to the needs of the users of their financial statements, as well as to keep only one set of accounting records to meet the needs of both their parent company and the users of their financial statements. In August 2025, the IASB issued amendments to IFRS 19 that will provide reduced disclosure requirements for new and amended IFRS Accounting Standards issued between February 2021 and May 2024 that were not considered when IFRS 19 was first issued. The standard and amendments are effective on or after January 1, 2027 and earlier application is permitted. The Group does not expect any impact from the adoption of this standard.

In May 2024, the IASB issued Amendments to the Classification and Measurement of Financial Instruments which amended IFRS 9 — *Financial Instruments* and IFRS 7 — *Financial Instruments: Disclosures*, with the aim of addressing diversity in practice by making the requirements more understandable and consistent. The amendments: (a) clarify the date of recognition and derecognition of certain financial assets and liabilities, with a new exception for certain financial liabilities settled through an electronic cash transfer system to be derecognized before the settlement date if certain criteria are met; (b) clarify and add further guidance for assessing whether a financial asset meets the solely payments of principal and interest (SPPI) criterion; (c) add new disclosures for certain instruments with contractual terms that can change cash flows (such as certain instruments with features linked to the achievement of environment, social and governance (ESG) targets), and (d) update the disclosures for equity instruments designated at fair value through other comprehensive income (FVOCI). The amendments are effective on or after January 1, 2026 and earlier application is permitted. The Group is evaluating the potential impact from the adoption of these amendments.

In July 2024, the IASB issued *Annual Improvements to IFRS Accounting Standards — Volume 11* which contains amendments to five standards as result of IASB's annual improvements project. IASB uses the annual improvements process to make necessary, but non-urgent, amendments to IFRS Accounting Standards that will not be included as part of another major project. The amended standards are: IFRS 1 — *First-time Adoption of International Financial Reporting Standards*, IFRS 7 — *Financial Instruments: Disclosures* and its accompanying *Guidance on implementing IFRS 7*; IFRS 9 — *Financial Instruments*; IFRS 10 — *Consolidated Financial Statements*, and IAS 7 — *Statement of Cash Flows*. The amendments are effective on or after January 1, 2026 and earlier application is permitted. The Group is evaluating the potential impact from the adoption of these amendments.

In November 2025, the IASB issued Amendments for translation to a hyperinflationary presentation currency which amended IAS 21 — *The Effects of Changes in Foreign Exchange Rates*, to clarify how companies should translate financial statements from a non-hyperinflationary currency into a hyperinflationary one. The amendments are effective on or after January 1, 2027 and earlier application is permitted. The Group does not expect any impact from the adoption of these amendments.

In November 2025, the IASB issued illustrative examples on reporting uncertainties in financial statements (Amendments to Illustrative Examples on IFRS 7, IFRS 18, IAS 1, IAS 8, IAS 36 and IAS 37 — *Disclosures about Uncertainties in the Financial Statements*). These illustrative examples demonstrate how companies can apply IFRS Accounting Standards when reporting the effects of uncertainties in their financial statements. As accompanying materials to IFRS Accounting Standards, these illustrative examples do not have an effective date. However, companies are expected to implement any changes in their reporting on a timely basis. There were no impacts to the Group's financial statements as a result of these illustrative examples.

Basis of consolidation***Subsidiaries***

Subsidiaries are entities over which the Group has control. Control is achieved when the Group has power over the investee, when it is exposed to, or has rights to, variable returns from its involvement with the investee, and has the ability to

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

use its power over the investee to affect the amount of the investor's returns. Subsidiaries are consolidated on a line by line basis from the date on which the Group achieves control. The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

The Group recognizes any non-controlling interests ("NCI") in the acquiree on an acquisition-by-acquisition basis, either at fair value or at the non-controlling interest's share of the recognized amounts of the acquiree's identifiable net assets. Net profit or loss and each component of other comprehensive income/(loss) are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income/(loss) of subsidiaries is attributed to owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

All intra-group balances and transactions and any unrealized gains and losses arising from intra-group transactions are eliminated in preparing the Consolidated Financial Statements.

Subsidiaries are deconsolidated from the date when control ceases. When the Group ceases to have control over a subsidiary, it derecognizes the assets (including any goodwill) and liabilities of the subsidiary at their carrying amounts, derecognizes the carrying amount of non-controlling interests in the former subsidiary and recognizes the fair value of any consideration received from the transaction. Any retained interest in the former subsidiary is then remeasured to its fair value.

Interests in associates

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but without having control or joint control over those policies. Associates are accounted for using the equity method of accounting from the date significant influence is obtained.

Under the equity method, the investments are initially recognized at cost and adjusted thereafter to recognize the Group's share of the profit/(loss) and other comprehensive income/(loss) of the investee. The Group's share of the investee's profit/(loss) is recognized in the consolidated income statement. Distributions received from an investee reduce the carrying amount of the investment. Post-acquisition movements in other comprehensive income/(loss) are recognized in other comprehensive income/(loss) with a corresponding adjustment to the carrying amount of the investment.

Unrealized gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associate. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

When the Group's share of the losses of an associate exceeds the Group's interest in that associate, the Group discontinues recognizing its share of further losses. Additional losses are provided for, and a liability is recognized, only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate.

The Group discontinues the use of the equity method from the date the investment ceases to be an associate or when it is classified as available-for-sale.

Interests in joint operations

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets and obligations for the liabilities, relating to the arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.

When the Group undertakes its activities under joint operations, it recognizes in relation to its interest in the joint operation: (i) its assets, including its share of any assets held jointly, (ii) its liabilities, including its share of any liabilities incurred jointly, (iii) its revenue from the sale of its share of the output arising from the joint operation, (iv) its share of the revenue from the sale of the output by the joint operation, and (v) its expenses, including its share of any expenses incurred jointly.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Foreign currency transactions

The functional currency of the Group's entities is the currency of their primary economic environment. In individual companies, transactions in foreign currencies are recorded at the exchange rate prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated at the foreign currency exchange rate prevailing at that date. Exchange differences arising on the settlement of monetary items or on reporting monetary items at rates different from those at which they were initially recorded during the period or in previous financial statements are recognized in the consolidated income statement.

Consolidation of foreign entities

All assets and liabilities of foreign consolidated companies with a functional currency other than the Euro are translated using the closing rates at the date of the consolidated statement of financial position. Income and expenses are translated into Euro at the average foreign currency exchange rate for the period. Translation differences resulting from the application of this method are classified as currency translation differences within other comprehensive income/(loss) until the disposal of the investment. Average foreign currency exchange rates for the period are used to translate the cash flows of foreign subsidiaries in preparing the consolidated statement of cash flows.

Goodwill, assets acquired and liabilities assumed arising from the acquisition of entities with a functional currency other than the Euro are recognized in the Consolidated Financial Statements in the functional currency and translated at the foreign currency exchange rate at the acquisition date. These balances are translated at subsequent balance sheet dates at the relevant foreign currency exchange rate.

The principal foreign currency exchange rates used to translate other currencies into Euro are presented below.

	2025		2024		2023	
	Average	At December 31,	Average	At December 31,	Average	At December 31,
U.S. Dollar	1.1300	1.1750	1.0824	1.0389	1.0814	1.1050
Pound Sterling	0.8568	0.8726	0.8466	0.8292	0.8699	0.8691
Swiss Franc	0.9370	0.9314	0.9526	0.9412	0.9717	0.9260
Japanese Yen	169.0435	184.0900	163.8519	163.0600	151.8540	156.3300
Chinese Yuan	8.1185	8.2262	7.7875	7.5833	7.6568	7.8509
Australian Dollar	1.7518	1.7581	1.6397	1.6772	1.6283	1.6263

Canadian Dollar	1.5787	1.6088	1.4821	1.4948	1.4595	1.4642
Hong Kong Dollar	8.8104	9.1464	8.4454	8.0686	8.4663	8.6314

Intangible assets

Goodwill

Goodwill is not amortized, but is tested for impairment annually or more frequently if events or changes in circumstances indicate that it might be impaired. After initial recognition, goodwill is measured at cost less any accumulated impairment losses.

Development costs

Development costs for car project production and related components, engines and systems are recognized as an asset if, and only if, the required conditions under IAS 38 — *Intangible Assets* are met, including, among others: (i) that development costs can be measured reliably, (ii) that the technical feasibility of the product, volumes and pricing support the view that the development expenditure will generate future economic benefits, and (iii) the Group has the intention to complete the development and the ability to use the intangible asset. Capitalized development costs include all direct and

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

indirect costs that may be directly attributed to the development process. All other research and development costs are expensed as incurred, net of any government grants received.

Capitalized development costs are amortized on a straight-line basis from the start of production over the estimated lifecycle of the model or the useful life of the related components or other assets (generally between four and eight years). Increasing an asset's expected lifecycle or its residual value would result in a reduced amortization charge in the consolidated income statement.

The Group incurs significant research and development costs also for its Formula 1 racing activities. These costs are considered fundamental to the development of the road and track car models and prototypes. Technological developments and changes in the regulations of the Formula 1 World Championship generally require the Group to design, develop and construct a new racing car to be used for one year only. The costs incurred for the design, development and construction of a new racing car are generally expensed as incurred unless the technology will be used for more than one year and the costs meet the capitalization criteria in IAS 38.

Patents, concessions and licenses

Separately acquired patents, concessions and licenses are initially recognized at cost. Patents, concessions and licenses acquired in a business combination are initially recognized at fair value. Patents, concessions and licenses are amortized on a straight-line basis over their useful economic lives, which is generally between three and five years.

Other intangible assets

Other intangible assets mainly relate to the registration of trademarks and have been recognized in accordance with IAS 38 — *Intangible Assets*, where it is probable that the use of the asset will generate future economic benefits for the Group and where the cost of the asset can be measured reliably. Other intangible assets are measured at cost less any impairment losses and amortized on a straight-line basis over their estimated life, which is generally between three and five years.

Property, plant and equipment***Cost***

Property, plant and equipment is initially recognized at cost which comprises the purchase price, any costs directly attributable to bringing the assets to the location and condition necessary to be capable of operating in the manner intended by management, capitalized borrowing costs and any initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located. Self-constructed assets are initially recognized at production cost. Subsequent expenditures and the cost of replacing parts of an asset are capitalized only if they increase the future economic benefits embodied in that asset. All other expenditures are expensed as incurred. When such replacement costs are capitalized, the carrying amount of the parts that are replaced is recognized as a loss in the period of replacement in the consolidated income statement.

Depreciation

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets presented below.

	Depreciation rates
Industrial buildings	3% - 20%
Plant, machinery and equipment	5% - 22%
Other assets	12% - 25%

Land is not depreciated.

If the asset being depreciated consists of separately identifiable components whose useful lives differ from that of the other parts making up the asset, depreciation is charged separately for each of its component parts through application of the "component approach".

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Leases

The Group recognizes a right-of-use asset and a corresponding lease liability at the date at which the leased asset is available for use. Each lease payment is allocated between the principal liability and finance costs. Finance costs are charged to the consolidated income statement over the lease period using the effective interest rate method. The right-of-use asset is depreciated on a straight-line basis over the lease term.

Right-of-use assets are measured at cost comprising the following: (i) the amount of the initial measurement of lease liability; (ii) any lease payments made at or before the commencement date less any lease incentives received; (iii) any initial direct costs and, if applicable, (iv) restoration costs. Payments associated with short-term leases and leases of low-value assets are recognized as an expense in the consolidated income statement on a straight-line basis.

Lease liabilities are measured at the net present value of the following: (i) fixed lease payments, (ii) variable lease payments that are based on an index or a rate and, if applicable, (iii) amounts expected to be payable by the lessee under residual value guarantees, and (iv) the exercise price of a purchase option if the lessee is reasonably certain to exercise that option. Lease liabilities do not include any non-lease components that may be included in the related contracts.

Lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined, the Group's incremental borrowing rate is used, being the rate that the Group would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

Some lease contracts contain variable payment terms that are linked to sales generated from Ferrari stores. Variable lease payments that depend on sales are recognized in the consolidated income statement in the period in which the condition that triggers those payments occurs.

Extension and termination options are included in a number of leases related to Ferrari stores, warehouses and machinery and equipment of the Group. In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

Borrowing costs

General and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use.

All other borrowing costs are expensed in financial expenses if related to the Group's industrial activities or cost of sales if related to the Group's financial services activities in the consolidated income statement, as incurred.

Impairment of assets

The Group continuously monitors its operations to assess whether there is any indication that its intangible assets (including capitalized development costs) and its property, plant and equipment may be impaired. Goodwill is tested for impairment annually or more frequently, if there is an indication that an asset may be impaired.

If indications of impairment are present, the carrying amount of the asset is reduced to its recoverable amount, which is the higher of fair value less costs of disposal and its value in use. The recoverable amount is determined for the individual asset, unless the asset does not generate cash inflows that are largely independent of the cash inflows from other assets or groups of assets, in which case the asset is tested as part of the cash-generating unit ("CGU") to which the asset belongs. A CGU is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets. In assessing the value in use of an asset or CGU, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

the risks specific to the asset or CGU. An impairment loss is recognized if the recoverable amount is lower than the carrying amount.

Where an impairment loss for assets other than goodwill subsequently no longer exists or has decreased, the carrying amount of the asset or CGU is increased to the revised estimate of its recoverable amount, but not in excess of the carrying amount that would have been recorded had no impairment loss been recognized. The reversal of an impairment loss is recognized in the consolidated income statement immediately.

Financial instruments*Presentation*

Current financial assets include trade receivables, receivables from financing activities, derivative financial instruments, other current financial assets and cash and cash equivalents.

Investments and other financial assets include investments accounted for using the equity method as well as other securities and non-current financial assets.

Financial liabilities include debt (primarily bonds, notes, asset-backed financing (securitizations) and borrowings from banks), trade payables and other financial liabilities (mainly derivative financial instruments).

Measurement

Financial assets, other than investments accounted for using the equity method, and financial liabilities are measured in accordance with IFRS 9 - *Financial Instruments*.

Except for investments accounted for using the equity method, the Group initially measures financial assets at fair value plus, in the case of financial assets not measured at fair value through profit or loss, transaction costs.

Equity instruments held by the Group are recognized at fair value through profit or loss. When market prices are not directly available, the fair value is measured using appropriate valuation techniques (e.g. discounted cash flow analysis based on market information available at the balance sheet date).

Trade receivables and receivables from financing activities are originated in the ordinary course of business and held within a business model with the objective to hold the receivables in order to collect contractual cash flows that meet the “solely payments of principal and interest” criterion under IFRS 9, therefore they are measured at amortized cost using the effective interest rate method. Receivables with maturities greater than one year are discounted to present value.

Assessments are made regularly as to whether there is any objective evidence that a financial asset or group of financial assets may be impaired. If any such evidence exists, an impairment loss is recognized within selling, general and administrative costs for trade receivables and within cost of sales for receivables from financing activities. Under IFRS 9, a forward-looking expected credit loss model must be applied when assessing impairment. In making impairment assessments for trade receivables and for receivables from financing activities that are within the scope of IFRS 16, the Group applies the simplified approach to estimate the lifetime expected credit losses and considers its historical credit loss experience, adjusted for forward-looking factors specific to the nature of the Group’s receivables and economic environment. For all other receivables from financing activities, the Group applies the general approach, which requires the application of a three-stage model to assess whether there has been a significant increase in credit risk on the financial instrument since initial recognition.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Stage	Description	Time period for measurement of expected credit losses
Stage 1	A financial instrument that is not credit-impaired on initial recognition	12-month
Stage 2	A financial instrument with a significant increase in credit risk since initial recognition	Lifetime
Stage 3	A financial instrument that is credit-impaired or has defaulted	Lifetime

The Group considers a default to occur and a significant increase in credit risk to occur when the counterparty fails to make contractual payments within a certain number of days of when they fall due. For example, for receivables from financing activities this typically occurs when the counterparty fails to make contractual payments within 60 days of when the related receivables fall due, while for trade receivables this is assessed on a case by case basis.

Receivables are written off when the counterparty fails to make contractual payments and there is no reasonable expectation of recovery, and in any circumstance no later than 360 days. When trade receivables or receivables from financing activities have been written off, the Company may continue to engage in enforcement actions to attempt to recover the receivables. Receivables from financing activities are generally secured on the title of cars or other guarantees.

Financial liabilities, with the exception of derivative financial instruments, are measured at amortized cost using the effective interest rate method.

Derivative financial instruments

Derivative financial instruments are used for economic hedging purposes only in order to reduce financial risks and in particular, foreign currency risks. Derivative financial instruments qualify for hedge accounting only when at the inception of the hedge there is formal designation and documentation of the hedging relationship, the hedge is expected to be highly effective, its effectiveness can be reliably measured and it is highly effective throughout the financial reporting periods for which it is designated.

All derivative financial instruments are measured at fair value.

When derivative financial instruments qualify for hedge accounting, the following accounting treatments apply:

Cash flow hedges — Where a derivative financial instrument is designated as a hedge of the exposure to variability in future cash flows of a recognized asset or liability or a highly probable forecasted transaction and could affect the consolidated income statement, the effective portion of any gain or loss on the derivative financial instrument is recognized directly in other comprehensive income/(loss). The cumulative gain or loss is reclassified from other comprehensive income/(loss) to the consolidated income statement at the same time as the economic effect arising from the hedged item affects the consolidated income statement. The gain or loss associated with a hedge or part of a hedge that has become ineffective is recognized in the consolidated income statement immediately within net financial income/expenses. When a hedging instrument or hedge relationship is terminated but the hedged transaction is still expected to occur, the cumulative gain or loss realized to the point of termination remains in other comprehensive income/(loss) and is recognized in the consolidated income statement at the same time as the underlying transaction. If the hedged transaction is no longer probable, the cumulative unrealized gain or loss held in other comprehensive income/(loss) is recognized in the consolidated income statement immediately.

The Group does not use fair value hedges or hedges of a net investment.

If hedge accounting cannot be applied, the gains or losses from the fair value measurement of derivative financial instruments are recognized immediately within financial expenses.

Transfers of financial assets

The Group sells certain of its receivables from financing activities under securitization programs. Securitization transactions involve the sale of financial receivables to a special purpose vehicle, which in turn finances the purchase of such financial receivables by issuing asset-backed securities in the form of notes whose repayment of principal and interest

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

depends on the cash flows generated by the related financial receivables. The receivables sold as part of securitization programs are consolidated until collection from the customer as they do not meet the requirements for derecognition in accordance with IFRS 9.

The Group may also sell certain of its trade receivables through factoring transactions without recourse. The Group derecognizes the trade receivables when, and only when, the contractual rights and risks to the cash flows arising from the related trade receivables are no longer held or the Group has transferred the financial assets.

In the case of a transfer of receivables, if the Group transfers substantially all the risks and rewards of ownership of the receivables, it derecognizes the receivables and separately recognizes as assets or liabilities any rights and obligations created or retained in the transfer. On derecognition of the receivables, the difference between their carrying amount and the consideration received or receivable for the transfer of the receivables is recognized within cost of sales for receivables from financing activities and within financial income or financial expenses for trade receivables.

Trade receivables

Trade receivables are amounts due from clients for goods sold or services provided in the ordinary course of business. Trade receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest rate method, less any provision for allowances.

Inventories

Inventories of raw materials, semi-finished products and finished goods are stated at the lower of cost and net realizable value, cost being determined on a first-in first-out (FIFO) basis. The measurement of inventories includes the direct costs of materials, labor and indirect costs (variable and fixed). Purchase costs include ancillary costs. Prototypes are recognized at their estimated realizable value, if lower than production cost. Provision is made for obsolete and slow-moving raw materials, finished goods, spare parts and other supplies based on their expected future use and realizable value. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs for sale and distribution.

Cash and cash equivalents

Cash and cash equivalents includes cash in hand, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less.

Employee benefits*Defined contribution plans*

Costs arising from defined contribution plans are expensed as incurred.

Defined benefit plans

The Group's net obligations are determined separately for each plan by estimating the present value of future benefits that employees have earned in the current and prior periods, and deducting the fair value of any plan assets. The present value of the defined benefit obligation is measured using actuarial techniques and actuarial assumptions that are unbiased and mutually compatible and attributes benefits to periods in which the obligation to provide post-employment benefits arise by using the Projected Unit Credit Method.

The components of the defined benefit cost are recognized as follows:

- the service costs are recognized in the consolidated income statement by function and presented in the relevant line items (cost of sales, selling, general and administrative costs, research and development costs, etc.);
- the net interest on the defined benefit liability is recognized in the consolidated income statement as net financial income /(expenses), and is determined by multiplying the net liability/(asset) by the discount rate used to discount obligations taking into account the effect of contributions and benefit payments made during the year, and

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

- the remeasurement components of the net obligations, which comprise actuarial gains and losses and any change in the effect of the asset ceiling are recognized immediately in other comprehensive income/(loss). These remeasurement components are not reclassified in the consolidated income statement in a subsequent period.

Other long-term employee benefits

The Group's obligations represent the present value of future benefits that employees have earned in return for their service during the current and prior periods. Remeasurement components on other long-term employee benefits are recognized in the consolidated income statement in the period in which they arise.

Share-based compensation

The Group has implemented equity incentive plans that provide for the granting of share-based compensation to the Chairman, the Chief Executive Officer, all other members of the Ferrari Leadership Team and other key employees of the Group. The Group also provides share-based compensation as part of commercial agreements with certain suppliers. The share-based compensation arrangements are accounted for in accordance with *IFRS 2 — Share-based Payment*, which requires the Company to recognize share-based compensation expense based on fair value of awards granted. Compensation expense for the equity-settled awards containing market performance conditions is measured at the grant date fair value of the award using a Monte Carlo simulation model, which requires the input of subjective assumptions, including the expected volatility of the Company's common stock, the dividend yield, interest rates and a correlation coefficient between the common stock and the relevant market index. The fair value of the awards which are conditional only on a recipient's continued service to the Company is measured using the share price at the grant date adjusted for the present value of future distributions which employees will not receive during the vesting period.

Share-based compensation expense relating to the equity incentive plans is recognized over the service period within selling, general and administrative costs or cost of sales in the consolidated income statement depending on the function of the employee, with an offsetting increase to equity. Share-based compensation expense relating to commercial agreements with certain suppliers is recognized over the period in which the supplier's services are received and classified within the consolidated income statement depending on the function of the supplier's services, with an offsetting increase to equity.

Provisions

Provisions are recognized when the Group has a present obligation, legal or constructive, as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount of the obligation can be made.

Warranty and recall campaigns provision

All cars are sold with warranty coverage. The warranty coverage generally applies to defects that may become apparent within a certain period from the purchase of the car.

The warranty provision is recognized at the time of the sale of the car, based on the present value of management's estimate of the expected cost to fulfill the obligations over the contractual warranty period. Estimates are principally based on the Group's historical claims or costs experience and the cost of parts and services to be incurred in the activities. The costs related to these provisions are recognized within cost of sales at the time when they are probable and reasonably estimable.

See “—Use of estimates and judgments” below for further details relating to recall campaigns.

Deferred income

Deferred income relates to amounts received by the Group under various agreements, which are reliant on the future performance of a service or other act of the Group. Deferred income is recognized as net revenues when the Group has fulfilled its obligations under the terms of the various agreements.

Range models (models belonging to the Ferrari product portfolio, excluding Special Series, Icona, limited edition supercars and one-off models) are sold with a scheduled maintenance program to ensure that the cars are maintained to the highest standards to meet the Group's strict requirements for performance and safety. Amounts attributable to the

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

maintenance program are not recognized as income immediately, but are deferred over the maintenance program term. The amount of the deferred income related to this program is based on the estimated fair value of the service to be provided.

Advances

Advances relate to amounts received from or billed to customers in advance of having delivered the related cars or provided the related services. The advances are recognized in net revenues when the cars are shipped or the services provided.

Revenue recognition

Revenue is recognized when control over a product or service is transferred to a customer. Revenue is measured at the transaction price which is based on the amount of consideration that the Group expects to receive in exchange for transferring the promised goods or services to the customer and excludes any sales incentives as well as taxes collected from customers that are remitted to government authorities. The transaction price will include estimates of variable consideration to the extent it is probable that a significant reversal of revenue recognized will not occur. The Group enters into contracts that may include both products and services, which are generally capable of being distinct and accounted for as separate performance obligations.

The Group generates revenue from the sale of cars, spare parts and engines as well as from sponsorship, commercial and brand activities. The Group accounts for a contract with a customer when there is a legally enforceable contract between the Group and the customer, the rights of the parties are identified, the contract has commercial substance, and collectability of the contract consideration is probable. Payments from customers are typically due within 30 to 40 days of invoicing.

The Group does not recognize any assets associated with the incremental costs of obtaining a contract with a customer that are expected to be recovered. The majority of revenue is recognized at a point-in-time or over a period of one year or less, and the Group applies the practical expedient to recognize the incremental costs of obtaining a contract as an expense when incurred if the amortization period of the asset that would otherwise be recognized is one year or less.

Cars, spare parts and engines

The sales of cars, spare parts and engines have multiple performance obligations that include products, services, or a combination of products and services as contracts may include maintenance programs and extended warranties that are separately priced or not separately priced. Contracts may also include variable consideration for discounts such as sales incentives and performance based bonuses and product returns. The Group offers incentives to its third-party dealers, which are designed to promote the sale of cars and parts, as well as a variety of other performance indicators, which may be qualitative or quantitative, such as quality service, customer satisfaction and preservation of the Ferrari brand, among others. The cost of incentives is estimated at the inception of a contract at the expected amount that will ultimately be paid and is recognized as a reduction to revenue generally at the time of the sale or when the dealer is expected to achieve the required performance if in relation to other performance indicators different from sales. Revenues recognized are limited to the amount of consideration the Group expects to receive. The Group allocates the transaction price to the performance obligations based on the stand alone selling prices (SSP) for each obligation. When the SSP does not exist, the Group estimates the SSP based on the adjusted market approach.

Revenues for the sale of cars, spare parts and engines are recognized at a point in time when control of the cars, spare parts or engines is transferred to the customer based on shipping terms, which generally corresponds to the date when the cars, spare parts and engines are released to the carrier responsible for transportation to dealers or Maserati (the contract for the supply of engines to Maserati expired in December 2023). Revenues relating to the maintenance program are recognized over time based on the input method of measuring progress towards complete satisfaction of the related performance obligation, calculated as a proportion of overall revenues expected during the maintenance period equal to the ratio of costs incurred in the reporting period compared to the overall costs to be incurred during the maintenance period. Revenues relating to the extended warranties are recognized on a straight-line basis over the extended warranty period. Revenues from the supply of engines and related services to other Formula 1 racing teams are recognized over time on a time and materials basis when the services are provided.

Management has exercised judgment in determining performance obligations, variable consideration, allocation of transaction price and the timing of revenue recognition.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Sponsorship, commercial and brand activities

Revenues from sponsorship agreements in connection with our participation in racing competitions are generally recognized ratably over the contract term as the customer benefits from the service throughout the service period. Revenues from sponsorship agreements that contain variable consideration based on the performance of the Group's racing teams are estimated and recognized over the relevant period to the extent that it is highly probable that a significant reversal in the amount of the cumulative revenue recognized will not occur, which is typically when it is considered highly probable that the related conditions associated with the variable consideration will be achieved.

Revenues from commercial activities primarily relate to the revenues from participating in the Formula 1 World Championship. The revenues attributable to each racing team are governed by a specific agreement and depend upon, among other factors, the prior year ranking of each of the racing teams. Revenues of the commercial activities are recognized ratably over the contract term.

Revenues from brand licensing agreements where the customer has a right to access the Group's brands or the contract includes minimum guaranteed payments are recognized on a straight-line basis over the contract term. Licensing revenues in excess of the minimum guaranteed payments are recognized when the related conditions are satisfied. Revenues from sales-based licensing agreements are recognized when the sales occur.

Management has exercised judgment in determining variable consideration.

Other revenues

Interest income generated by our financial service activities from the provision of client and dealer financing is reported within revenues using the effective interest rate method and not within net financial income/expenses.

Cost of sales

Cost of sales comprises expenses incurred in the manufacturing and distribution of cars and parts (including the engines rented to other Formula 1 racing teams), of which, cost of materials, components and labor costs are the most significant portion. The remaining costs principally include depreciation, amortization, insurance and transportation costs. Cost of sales also includes warranty and product-related costs, which are estimated and recorded at the time of sale of the car.

Costs that are directly attributable to financial services activities, including interest expenses related to financing and provisions for risks and write-downs of assets, are also reported in cost of sales.

Other expenses and other income

Other expenses consist of miscellaneous costs which cannot be allocated to specific functional areas, such as indirect taxes, accruals for provisions not attributable to cost of sales or selling, general and administrative costs, and other miscellaneous expenses, including marketing expenses incurred on behalf of our third-party dealers.

Other income consists of miscellaneous income that is not directly attributable to the sale of goods or services, such as gains on the disposal of property plant and equipment, the release of certain provisions originally recognized as other expenses, rental income and other miscellaneous income.

Taxes

Income taxes include all taxes based upon the taxable profits of the Group. Current and deferred taxes are recognized as income or expense and are included in the consolidated income statement for the period, except tax arising from (i) a transaction or event which is recognized, in the same or a different period, either in other comprehensive income/(loss) or directly in equity, or (ii) a business combination.

Deferred taxes are accounted using the balance sheet method. Deferred tax liabilities are recognized for all taxable temporary differences between the carrying amounts of assets or liabilities and their tax base, except to the extent that the deferred tax liabilities arise from the initial recognition of goodwill or the initial recognition of an asset or liability in a

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

transaction which is not a business combination and at the time of the transaction, affects neither accounting profit nor taxable profit. Deferred tax assets are recognized for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilized, unless the deferred tax assets arise from the initial recognition of an asset or liability in a transaction that is not a business combination and at the time of the transaction, affects neither accounting profit nor taxable profit.

Deferred tax assets and liabilities are measured at the substantively enacted tax rates in the respective jurisdictions in which the Group operates that are expected to apply to the period when the asset is realized or liability is settled. Any remeasurements to deferred tax assets and liabilities as a result of changes in substantially enacted tax rates are recognized in the consolidated income statement.

The recoverability of deferred tax assets is dependent on the Group's ability to generate sufficient future taxable income in the period in which it is assumed that the deductible temporary differences reverse and tax losses carried forward can be utilized. In making this assessment, the Group considers future taxable income arising on the most recent budgets and plans, prepared by using the same criteria described for testing the impairment of assets and goodwill, moreover, it estimates the impact of the reversal of taxable temporary differences on earnings and it also considers the period over which these assets could be recovered. The carrying amount of deferred tax assets is reduced to the extent that it is not probable that sufficient taxable profit will be available to allow the benefit of part or all of the deferred tax assets to be utilized. The carrying amount of deferred tax assets is reviewed at each reporting date.

The Group recognizes deferred tax liabilities associated with the existence of a subsidiary's undistributed profits, except when it is able to control the timing of the reversal of the temporary difference and it is probable that this temporary difference will not reverse in the foreseeable future. The Group recognizes deferred tax assets associated with the deductible temporary differences on investments in subsidiaries only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary difference can be utilized.

Deferred tax assets relating to the carry-forward of unused tax losses and tax credits, as well as those arising from deductible temporary differences, are recognized to the extent that it is probable that future profits will be available against which they can be utilized.

Current income taxes and deferred taxes are offset when they relate to the same taxation authority and there is a legally enforceable right of offset.

Imposta Regionale sulle Attività Produttive ("IRAP") is recognized within income tax expense. IRAP is calculated on a measure of income defined by the Italian Civil Code as the difference between operating revenues and costs, before financial income and expense, and in particular before the cost of fixed-term employees, credit losses and any interest included in lease payments. IRAP is applied on the tax base at 3.9 percent for the years ended December 31, 2025, 2024 and 2023.

Tax uncertainties are accounted for in accordance with IFRIC 23.

Other taxes not based on income, such as property taxes and capital taxes, are included in other expenses, net.

Dividends

Dividends payable by the Group are reported as a change in equity in the period in which they are approved by shareholders or the Board of Directors as applicable under local rules and regulations.

Rounding of amounts

All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest thousand Euro unless otherwise stated.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Segment reporting

The Group has determined that it has one operating and one reportable segment based on the information reviewed by the Board of Directors (the Group's "Chief Operating Decision Maker" as defined in IFRS 8 — *Operating Segments*) in making decisions regarding the allocation of resources and to assess performance.

For additional disclosures required by IFRS 8, see Note 31 "*Entity-Wide Disclosures*".

Use of estimates and judgments

The Consolidated Financial Statements are prepared in accordance with IFRS Accounting Standards, which require the use of estimates, judgments and assumptions that affect the carrying amount of assets and liabilities, the disclosure of contingent assets and liabilities and the amounts of income and expenses recognized. The estimates and associated assumptions are based on elements that are known when the financial statements are prepared, on historical experience and on any other factors that are considered to be relevant.

Estimates and underlying assumptions are reviewed periodically and continuously by the Group. If the items subject to estimates do not perform as assumed, then the actual results could differ from the estimates, which would require adjustments. The effects of any changes in estimates are recognized in the consolidated income statement in the period in which the changes are made, or prospectively in future periods.

Based on information available to management at the end of the reporting period, there were no major sources of estimation uncertainty that could have a significant risk of resulting in a material adjustment to the carrying amount of assets and liabilities within the next financial year. Additionally, no critical judgments have been made in applying the accounting policies.

The main accounting policies affected by estimates and judgments are disclosed below.

Maintenance programs and extended warranties

The Group's new cars are sold with a scheduled maintenance program to ensure that the cars are maintained to the highest standards to meet the Group's strict requirements for performance and safety. Amounts attributable to the maintenance programs are not recognized as income immediately, but are recognized over the maintenance program term based on the input method of measuring progress towards complete satisfaction of the related performance obligation, calculated as a proportion of overall revenues expected during the maintenance period equal to the ratio of costs incurred in the reporting period compared to the overall costs to be incurred during the maintenance period. The amount of the deferred income related to this program is based on the estimated fair value of the service to be provided. The Group also offers various extended warranty programs to customers that provide additional coverage beyond the warranty period required by applicable law or included with all new car sales. Revenues relating to the extended warranties are recognized on a straight-line basis over the extended warranty period. Management utilizes estimates or judgments in determining performance obligations, variable consideration, allocation of the transaction price and the timing of revenue recognition in relation to its maintenance programs and extended warranties.

Recall campaigns

The Group periodically initiates voluntary service actions to address various client satisfaction, safety and emissions issues related to cars sold. Included in the reserve is the estimated cost of these services and recall actions. Considering the nature of the recall campaigns, in certain circumstances management may utilize estimates or judgments in determining the related provisions. The estimated future costs of these actions are based primarily on historical experience and the cost of parts and services to be incurred in the specified activities, and are recognized at the time when they are probable and reasonably estimable. Estimates of the future costs of these actions are inevitably imprecise due to several uncertainties, including the number of cars affected by a service or recall action. It is reasonably possible that the ultimate cost of these service and recall actions may require the Group to make expenditures in excess of (or less than) established reserves over an extended period of time and the estimates are periodically reviewed during the year. Due to the uncertainty and potential volatility of these estimated factors, changes in the assumptions used could affect the results of operations.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Goodwill

The Group's goodwill amounted to €785,182 thousand at December 31, 2025 and December 31, 2024. As required by IFRS Accounting Standards, an annual impairment test must be performed for goodwill, which requires management to estimate expected future cash flows and the recoverable amount of the cash-generating unit (CGU), which is represented by the entire Ferrari Group. Based on the impairment tests performed by management, the recoverable amount of goodwill was significantly higher than its carrying amount for the years ended December 31, 2025, 2024 and 2023. Furthermore, the exclusivity of the Group's business, its historical profitability and its future earnings prospects indicate that the carrying amount of the goodwill will continue to be recoverable even in the event of difficult economic and market conditions, including those that may be caused by regulatory developments or climate-related matters. For additional information relating to the goodwill test performed, see Note 13 "*Goodwill*".

Non-current assets with definite useful lives

The Group's non-current assets (excluding goodwill) primarily include intangible assets, which primarily relate to development costs, and property, plant and equipment. At December 31, 2025 and December 31, 2024, the Group's intangible assets amounted to €1,638,457 thousand and €1,545,664 thousand, respectively (of which €1,595,783 thousand and €1,502,889 thousand related to development costs), and the Group's property, plant and equipment amounted to €2,057,891 thousand and €1,828,784 thousand, respectively. The Group makes significant investments for the development of its existing and future product portfolio, and capitalized development costs recognized for the years ended December 31, 2025 and 2024 amounted to €421,265 thousand and €476,467 thousand respectively. These costs were capitalized in accordance with the criteria in *IAS 38 - Intangible Assets*, including, among others: (i) the costs can be measured reliably, (ii) the technical feasibility of the product, estimated volumes and expected pricing all support the view that the development expenditure will generate future economic benefits, based primarily on information specific to business initiatives underlying the Group's business plans, and (iii) the Company has the intention to complete the development and the ability to use the related intangible assets. Management utilizes estimates or judgments in distinguishing between research phases and development phases, including as a result of regulatory developments. For the years ended December 31, 2025, 2024 and 2023, no impairment indicators were identified and the Group did not recognize any impairment charges for non-current assets with definite useful lives.

Provisions

The Group sells its cars around the world and is subject to a variety of laws and regulations relating to the environment, and in particular, to the emissions of its cars. The group's cars, together with the engines that power them, must comply with extensive regional, national and local laws and regulations, and industry self-regulations (including those that regulate vehicle safety). The Group is currently benefiting from certain regulatory exemptions because it qualifies as a small vehicle manufacturer or similar designation in certain jurisdictions where it sells cars. These exemptions provide a range of benefits, from less stringent emissions caps and compliance date extensions, to exemptions from zero emission vehicle production requirements, which may require management to utilize estimates or judgments. The Group recognized provisions for environmental risks based on management's best estimates of the future cash outflows that will be required to settle the Group's related obligations. For additional information, see Note 23 "*Provisions*".

Climate-related matters

Global climate change is resulting, and is expected to continue to result, in natural disasters and extreme weather occurring more frequently or with greater intensity, including droughts, wildfires, storms, rising sea-levels, flooding, heat waves and cold waves. Such extreme events are driving changes in market dynamics, stakeholder expectations, local, national and international climate change policies and regulations.

The global automotive industry in particular is currently experiencing significant developments due to an increased focus on climate change and evolving regulatory requirements and technological changes relating to fuel efficiency, electrification and greenhouse gas emissions, among others, which are also impacting the luxury performance sports car market in which the Group operates.

As these regulatory developments and technological changes continue to evolve, the Group's strategies, operations and business plans may change and the recoverability of the Group's assets could be impacted, including the recoverability of goodwill, capitalized development costs and property, plant and equipment as well as the accounting of the provisions.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

3. SCOPE OF CONSOLIDATION

Ferrari N.V. is the parent company of the Group and it holds, directly and indirectly, interests in the Group's main operating companies. The Group's scope of consolidation at December 31, 2025 and 2024 is presented below.

Name	Country	Nature of business	At December 31, 2025		At December 31, 2024

⁽⁴⁾ Shareholding held by Ferrari North America Inc.

⁽⁵⁾ Effective as of January 12, 2024, the company changed its name from 410 Park Display, Inc to Ferrari Lifestyle North America, Inc.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Non-controlling interests

The Group's non-controlling interests relate to (i) a 20 percent interest in Ferrari International Cars Trading (Shanghai) Co. L.t.d., for which the Group holds an 80 percent interest, and (ii) a 49 percent interest in Ferrari Korea Co., Ltd., for which the Group acquired a 51 percent interest in October 2025.

The equity and net profit attributable to non-controlling interests are presented below and are not considered to be significant to the Group.

	At December 31,	
	2025	2024
	(€ thousand)	
Equity attributable to non-controlling interests	7,849	9,292

	For the years ended December 31,		
	2025	2024	2023
	(€ thousand)		
Net profit attributable to non-controlling interests	2,597	4,036	5,409

4. NET REVENUES

A breakdown of net revenues is presented below.

	For the years ended December 31,		
	2025	2024	2023
	(€ thousand)		
Revenues from:			
Cars and spare parts	6,005,243	5,727,688	5,119,181
Sponsorship, commercial and brand	819,551	669,776	571,759
Other ⁽¹⁾	320,974	279,204	279,206
Total net revenues	7,145,768	6,676,668	5,970,146

(1) Primarily includes net revenues from financial services activities, the management of the Mugello racetrack and other sports-related activities, as well as net revenues generated from the rental of engines to other Formula 1 teams and, for the years ended December 31, 2024 and 2023 only, from the sale of engines to Maserati.

Interest and other financial income from financial services activities included within other net revenues in 2025, 2024 and 2023 amounted to €141,939 thousand, €130,406 thousand and €99,661 thousand, respectively.

5. COST OF SALES

Cost of sales in 2025, 2024 and 2023 amounted to €3,452,971 thousand, €3,329,483 thousand and €2,995,877 thousand, respectively, and consisted primarily of materials, components and labor related to the manufacturing and distribution of cars and spare parts. Cost of sales also includes depreciation and amortization, insurance, transportation costs, warranty and product-liability related costs, as well as production costs for engines supplied to other Formula 1 racing teams. In addition, cost of sales included costs related to engines sold to Maserati S.p.A., primarily in 2023, when the related supply contract expired.

Interest and other financial expenses from financial services activities included within cost of sales in 2025, 2024 and 2023 amounted to €99,206 thousand, €88,308 thousand and €60,808 thousand, respectively.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

6. SELLING, GENERAL AND ADMINISTRATIVE COSTS

A breakdown of selling, general and administrative costs is presented below.

	For the years ended December 31,		
	2025	2024	2023
	(€ thousand)		
Selling costs	349,392	288,538	236,443
General and administrative costs	293,098	272,606	226,137
Total selling, general and administrative costs	642,490	561,144	462,580

Selling costs consist mainly of expenses related to sales personnel, marketing and events, and retail stores. Costs for marketing and events primarily relate to corporate events, trade shows, and media and client events for the launch of new models, as well as lifestyle events, including the use of digital solutions. These costs also include indirect marketing and brand-promotion activities, including those incurred through the Formula 1 racing team, Scuderia Ferrari.

General and administrative costs consist mainly of administrative and other general expenses that are not directly attributable to manufacturing, sales, or research and development activities. These costs include, in particular, personnel-related expenses and costs associated with the development and maintenance of the Group's digital infrastructure.

7. RESEARCH AND DEVELOPMENT COSTS

A breakdown of research and development costs is presented below.

	For the years ended December 31,		
	2025	2024	2023
	(€ thousand)		
Research and development costs expensed during the year	592,690	563,311	538,903
Amortization of capitalized development costs	326,171	330,781	342,656
Total research and development costs	918,861	894,092	881,559

Research and development costs expensed primarily relate to Formula 1 racing activities and programs to support innovation across the Group's product portfolio and components, particularly those involving advanced technologies.

Research and development costs for the years December 31, 2025, 2024 and 2023 are presented net of technology-related government incentives.

8. OTHER EXPENSES, NET

A breakdown of other expenses, net is presented below.

	For the years ended December 31,		
	2025	2024	2023
	(€ thousand)		
Other income	21,188	21,818	10,958
Other expenses	55,490	34,261	29,856
Total other expenses, net	34,302	12,443	18,898

Other expenses primarily consist of indirect taxes, provisions, and other miscellaneous expenses, while other income primarily consists of rental income, gains on the disposal of property, plant and equipment and releases of previously recognized provisions, as well as other miscellaneous income.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

9. FINANCIAL EXPENSES AND FINANCIAL INCOME

A breakdown of financial expenses and financial income is presented below.

	For the years ended December 31,		
	2025	2024	2023
	(€ thousand)		
Foreign exchange gains	129,070	92,051	91,019
Interest income	20,416	31,486	25,813
Other financial income	18,659	23,563	15,487
Financial income	168,145	147,100	132,319
Foreign exchange losses	167,230	99,087	111,216
Interest expenses	41,168	40,054	29,258
Other financial expenses	5,828	6,754	6,860
Financial expenses	214,226	145,895	147,334
Financial expenses/(income), net	46,081	(1,205)	15,015

Financial expenses primarily relate to foreign exchange losses, including the net costs of hedging, and interest expenses on debt.

Financial income primarily relates to foreign exchange gains and interest income on cash and cash equivalents. In 2023, financial income includes gains of €7,940 thousand realized on the partial cash tender executed during the third quarter of 2023 on a bond that was fully repaid in 2025, upon maturity. For additional information, see Note 24 “Debt”.

Interest and other financial income from financial services activities, and interest expenses and other financial charges relating to those activities, are recognized within net revenues and cost of sales, respectively.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

10. INCOME TAXES

A breakdown of income tax expense is presented below.

	For the years ended December 31,		
	2025	2024	2023
	(€ thousand)		
Current tax expense	360,443	383,481	347,162
Deferred tax expense/(benefit)	106,556	(17,483)	(4,541)
Taxes relating to prior years	(2,880)	(2,955)	2,276
Total income tax expense	464,119	363,043	344,897

The Group's Italian entities participate in a group Italian tax consolidation under Ferrari N.V.

Income tax expense amounted to €464,119 thousand, €363,043 thousand and €344,897 thousand for the years ended December 31, 2025, 2024 and 2023, respectively.

Income taxes for the years ended December 31, 2023 and 2024 benefited from the coexistence of two Patent Box tax regimes. The original Patent Box regime, introduced by Italian Law No. 190/2014, was applied by the Group until 2024, granting a tax exemption (up to 50%) on extra profits attributable to eligible intangible assets, with the benefit recognized over three annual installments starting from 2020. In parallel, the new Patent Box regime, regulated by Law Decree No. 146 and effective from October 22, 2021, introduced a 110% super tax deduction for costs related to eligible intangible assets. Italian tax legislation provided for a transitional period allowing both regimes to be applied until 2024, when the original regime expired. Consequently, for the year ended December 31, 2025, income taxes reflect the benefits under the new Patent Box regime only.

A reconciliation between actual income tax expense and the theoretical income tax expense, calculated on the basis of the applicable corporate tax rate in effect in Italy, which was 24.0 percent for each of the years ended December 31, 2025, 2024 and 2023 is provided below.

	For the years ended December 31,		
	2025	2024	2023
	(€ thousand)		
Profit before taxes	2,063,635	1,888,956	1,602,354
Theoretical income tax rate	24.0%	24.0%	24.0%
Theoretical income tax expense	495,272	453,349	384,565
Tax effect on:			
Permanent and other differences	(104,596)	(145,802)	(95,836)
Italian Regional Income Tax (IRAP)	70,332	50,408	48,912
Effect of changes in tax rates and tax regulations	653	938	961
Differences between foreign tax rates and the theoretical Italian tax rate and tax holidays	2,265	2,681	2,156
Taxes relating to prior years	(2,880)	(2,955)	2,276
Withholding tax on earnings	3,073	4,424	1,863
Income tax expense	464,119	363,043	344,897
Effective tax rate	22.5%	19.2%	21.5%

The effective tax rate was 22.5 percent, 19.2 percent and 21.5 percent for the years ended December 31, 2025, 2024 and 2023, respectively. The Patent Box benefit is included within "permanent and other differences" in the tax rate reconciliation above.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Imposta Regionale sulle Attività Produttive (“IRAP”) (current and deferred) in 2025, 2024 and 2023 amounted to €70,332 thousand, €50,408 thousand and €48,912 thousand, respectively. IRAP is only applicable to Italian entities and is calculated on a measure of income defined by the Italian Civil Code as the difference between operating revenues and costs, before financial income and expense, and in particular before the cost of fixed-term employees, credit losses and any interest included in lease payments. IRAP is calculated using financial information prepared under Italian accounting standards. IRAP is applied on the tax base at 3.9 percent for each of the years ended December 31, 2025, 2024 and 2023.

A breakdown of deferred tax assets and deferred tax liabilities at December 31, 2025 and 2024 is provided below.

	At December 31,	
	2025	2024
	(€ thousand)	
Deferred tax assets:		
To be recovered after 12 months	134,196	93,073
To be recovered within 12 months	91,809	143,718
	226,005	236,791
Deferred tax liabilities:		
To be realized after 12 months	(146,463)	(82,429)
To be realized within 12 months	(107,924)	(27,587)
	(254,387)	(110,016)
Net deferred tax (liabilities)/assets	(28,382)	126,775

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

The movements in deferred income tax assets and liabilities during the year, without taking into consideration the offsetting of balances within the same tax jurisdiction, are summarized below.

	At December 31, 2024	Recognized in consolidated income statement	Charged to equity	Translation differences and other changes	At December 31, 2025
			(€ thousand)

Deferred tax assets (prior to offsetting)	519,616	55,437	14,010	4,260	593,323
Offsetting of deferred tax assets	(302,063)				(356,532)
Total deferred tax assets	217,553				236,791
Deferred tax liabilities arising on:					
Depreciation	(3,458)	(645)	—	(155)	(4,258)
Capitalization of development costs	(385,257)	(37,132)	—	—	(422,389)
Tax on undistributed earnings	(18,859)	(1,178)	—	—	(20,037)
Other	(31,335)	1,001	9,768	702	(19,864)
Total deferred tax liabilities (prior to offsetting)	(438,909)	(37,954)	9,768	547	(466,548)
Offsetting of deferred tax liabilities	302,063				356,532
Total deferred tax liabilities	(136,846)				(110,016)
Total net deferred tax assets/ (liabilities)	80,707	17,483	23,778	4,807	126,775

The decision to recognize deferred tax assets is made for each company in the Group by assessing whether the conditions exist for the future recoverability of such assets by taking into account the basis of the most recent forecasts from budgets and business plans.

Deferred taxes on the undistributed earnings of subsidiaries have not been recognized, except in cases where it is probable the distribution will occur in the foreseeable future. At December 31, 2025, the aggregate amount of temporary differences related to remaining distributable earnings of the Group's subsidiaries where deferred tax liabilities have not been recognized amounted to €395,685 thousand (€286,653 thousand at December 31, 2024).

11. OTHER INFORMATION BY NATURE

Personnel costs in 2025, 2024 and 2023 amounted to €662,496 thousand, €626,287 thousand and €575,215 thousand, respectively. These amounts include costs that were capitalized in connection with product development activities. In 2025, 2024 and 2023, the average number of employees of the Group was 5,544, 5,327 and 4,960, respectively.

Depreciation of property, plant and equipment amounted to €298,734 thousand, €299,638 thousand and €290,204 thousand for the years ended December 31, 2025, 2024 and 2023, respectively.

Amortization of intangible assets amounted to €363,202 thousand, €367,139 thousand and €372,101 thousand for the years ended December 31, 2025, 2024 and 2023, respectively.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

12. EARNINGS PER SHARE

Basic earnings per share

Basic earnings per share is calculated by dividing the profit attributable to owners of the Company by the weighted average number of common shares issued and outstanding during the period.

The following table provides the amounts used in the calculation of basic earnings per share for the years ended December 31, 2025, 2024 and 2023.

		For the years ended December 31,		
		2025	2024	2023
Profit attributable to owners of the Company	€ thousand	1,596,919	1,521,877	1,252,048
Weighted average number of common shares for basic earnings per common share	thousand	178,125	179,743	181,220
Basic earnings per common share	€	8.97	8.47	6.91

Diluted earnings per share

For the years ended December 31, 2025, 2024 and 2023, the weighted average number of shares for diluted earnings per share was increased to take into consideration the dilutive effects of the potential common shares relating to the Group's equity incentive plans (assuming 100 percent of the target awards vested). For additional information relating to the Group's equity incentive plans, see Note 21 "*Share-Based Compensation*".

The following table provides the amounts used in the calculation of diluted earnings per share for the years ended December 31, 2025, 2024 and 2023.

		For the years ended December 31,		
		2025	2024	2023
Profit attributable to owners of the Company	€ thousand	1,596,919	1,521,877	1,252,048
Weighted average number of common shares for diluted earnings per common share	thousand	178,321	179,992	181,511
Diluted earnings per common share	€	8.96	8.46	6.90

The following table provides a reconciliation from the weighted average number of common shares for basic earnings per share to the weighted average number of common shares for diluted earnings per share.

		For the years ended December 31,		
		2025	2024	2023
<i>Number of shares</i>				
Weighted average number of common shares for basic earnings per share		178,125	179,743	181,220
Adjustments for calculation of diluted earnings per share:				
Share-based compensation		196	249	291
Weighted average number of common shares for diluted earnings per share		178,321	179,992	181,511

13. GOODWILL

At December 31, 2025 and 2024 goodwill amounted to €785,182 thousand.

In accordance with IAS 36, goodwill is not amortized and is tested for impairment annually, or more frequently if facts or circumstances indicate that the asset may be impaired. Impairment testing is performed by comparing the carrying amount and the recoverable amount of the cash-generating unit (CGU), which is represented by the entire Ferrari Group. The recoverable amount of the CGU is the higher of its fair value less costs of disposal and its value in use.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

The assumptions used in this process represent management's best estimate for the period under consideration. The estimate of the value in use of the CGU for purposes of performing the annual impairment test was based on the following assumptions:

- The expected future cash flows covering the period from 2026 through 2030 have been derived from the Ferrari budgets and business plan. In particular the estimate considers expected EBITDA adjusted to reflect the expected capital expenditure. These cash flows relate to the CGU in its condition when preparing the consolidated financial statements and exclude the estimated cash flows that might arise from restructuring plans or other structural changes. Expected volumes and sales mix used for estimating the future cash flows are based on assumptions that are considered reasonable and sustainable and represent the best estimate of expected conditions regarding market trends for the CGU over the period considered.
- The expected future cash flows include a normalized terminal period used to estimate the future results beyond the time period explicitly considered, which were calculated by using the specific medium/long-term growth rate for the sector equal to 2.0 percent in 2025 (2.0 percent in 2024 and 2023).
- The expected future cash flows have been estimated in Euro, and discounted using a post-tax discount rate appropriate for that currency, determined by using a base WACC of 9.0 percent in 2025 (8.5 percent in 2024 and 9.2 percent in 2023). The WACC used reflects the current market assessment of the time value of money for the period being considered and the risks specific to the CGU under consideration.

The recoverable amount of the CGU was significantly higher than its carrying amount. Furthermore, the exclusivity of the business, its historical profitability and its future earnings prospects indicate that the carrying amount of the goodwill will continue to be recoverable, even in the event of difficult economic and market conditions.

For additional information related to climate-related matters, see Note 2 *“Material Accounting Policies—Use of estimates and judgments—Climate-related matters—Goodwill”*.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

14. INTANGIBLE ASSETS

Movements in intangible assets are summarized below.

	Externally acquired development costs	Development costs internally generated	Patents, concessions and licenses	Other intangible assets	Total
	(€ thousand)				
Gross carrying amount at December 31, 2023	2,607,792	1,188,371	318,585	67,788	4,182,536
Additions	306,559	169,908	26,453	3,954	506,874

Additions to property, plant and equipment primarily related to investments in car and engine production lines, including those supporting models to be launched in future years, as well as investments for personalization programs, the e-Building and the ongoing construction of the new paint shop. The e-Building was inaugurated in June 2024 and is used for the production and development of models with internal combustion, hybrid and fully electric powertrains, as well as strategic electrical components.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Movements in right-of-use assets are summarized below.

	Industrial buildings	Plant, machinery and equipment	Other assets	Total
	(€ thousand)

Balance at December 31, 2025	37,022	6,131	103,113	146,266

A breakdown of lease expenses is presented below.

	For the year ended December 31,		
	2025	2024	2023
	(€ thousand)		
Depreciation of right-of-use assets	32,851	26,786	19,589
Interest expense on lease liabilities	5,032	3,356	1,450
Variable lease payments not included in the measurement of lease liabilities	1,245	1,781	1,213
Expenses relating to short-term leases and leases of low-value assets	4,043	3,077	2,842
Total expenses recognized	43,171	35,000	25,094

For the year ended December 31, 2025 depreciation of right-of-use assets amounted to €32,851 thousand and interest expense on lease liabilities amounted to €5,032 thousand (€26,786 thousand and €3,356 thousand, respectively, for the year ended December 31, 2024 and €19,589 thousand and €1,450 thousand respectively, for the year ended December 31, 2023).

At December 31, 2025, the Group had contractual commitments for the purchase of property, plant and equipment amounting to €275,178 thousand (€397,473 thousand at December 31, 2024), reflecting investments the Group is making to expand vehicle architectures, strengthen infrastructure, including the new paint shop, and support innovation in advanced technologies such as hybrid and electric powertrains.

At December 31	36,238	33,376

Receivables from financing activities

Receivables from financing activities relate to financing provided by the Group to Ferrari clients to finance their car acquisitions in the United States. The underlying receivables are denominated in U.S. Dollars and are generally secured on the title of cars or other guarantees.

During 2025 the average contractual duration at inception of such contracts was approximately 69 months (68 months in 2024) and the weighted average interest rate was approximately 8.8 percent (approximately 8.3 percent in 2024). Receivables for client financing are generally secured on the titles of the related cars or other personal guarantees.

Receivables from financing activities are shown net of an allowance for doubtful accounts and additional provisions are recorded within cost of sales in the consolidated income statement.

Changes in the allowance for doubtful accounts of receivables from financing activities are presented below.

Total amount	66,259	3,928,108	(42,544)	3,707,535

(1) Other mainly relates to the Australian Dollar, the Canadian Dollar and the Hong Kong Dollar.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Cash flow hedges

Cash flow hedges mainly relate to foreign currency risk management and in particular, the exposure to fluctuations in the Euro/U.S. Dollar exchange rate for sales in U.S. Dollars.

The policy of the Group for managing foreign currency risk normally requires hedging of a portion of projected future cash flows from trading activities and orders acquired (or contracts in progress) in foreign currencies that will occur within the following 12 months. According to such policy, the hedging strategy is periodically updated and rebalanced, generally on a monthly basis. Derivatives relating to foreign currency risk management are treated as cash flow hedges where the derivative qualifies for hedge accounting. The amounts recorded in the cash flow hedge reserve within other comprehensive income will be recognized in the consolidated income statement according to the timing of the flows of the underlying transactions. Management believes that substantially all of the hedging effects arising from these derivative contracts and recorded in the cash flow hedge reserve will be recognized in the consolidated income statement within the following 12 months from the reporting date.

A breakdown of gains and losses, net of the related tax effects, reclassified from other comprehensive income/(loss) to the consolidated income statement is presented below.

	For the years ended December 31,		
	2025	2024	2023
	(€ thousand)		
Net revenues	60,389	20,827	48,393
Income tax expenses	(16,849)	(5,811)	(13,502)
Total recognized in the consolidated income statement	43,540	15,016	34,891

The ineffectiveness of cash flow hedges was not material for the years 2025, 2024 and 2023.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

20. EQUITY

Share capital

At December 31, 2025 and 2024 the fully paid up share capital of the Company was €2,573 thousand. The following table summarizes the number of common shares and special voting shares of the Company at December 31, 2025 and December 31, 2024, each of which has a nominal value of €0.01.

	Common shares			Special voting shares		
	Total	Outstanding	Held in treasury	Total	Outstanding	Held in treasury
At December 31, 2023	193,923,499	180,418,090	13,505,409	63,349,112	63,332,872	16,240

Total shares (common shares and special voting shares)	9.07%	5.79%				
Common shares	6.47%	5.78%				

- (1) Includes shares repurchased under the share repurchase program between January 1, 2025 and December 31, 2025 based on the transaction trade date, for a total consideration, including transaction costs and including the shares purchased under Sell to Cover (as described below), of €785,329 thousand.
- (2) On March 13, 2025, 113,466 common shares, which were previously held in treasury, were assigned to participants of the equity incentive plans as a result of the vesting of certain performance share unit and retention restricted share unit awards. On the same day, the Company purchased 47,907 common shares, for a total consideration of €19,834 thousand, from a group of those employees who were assigned shares in order to cover the individual's taxable income as is standard practice (Sell to Cover) in a cross transaction. Between April and September 2025, 46,023 share awards vested under the broad-based employee share ownership plan and agreements with suppliers. On March 15, 2024, 76,979 common shares, which were previously held in treasury, were assigned to participants of the equity incentive plans as a result of the vesting of certain performance share unit and retention restricted share unit awards. On the same day, the Company purchased 35,189 common shares, for a total consideration of €13,548 thousand, from a group of those employees who were assigned shares in order to cover the individual's taxable income as is standard practice (Sell to Cover) in a cross transaction.
- (3) Relates to the deregistration of special voting shares, under the Company's special voting shares terms and conditions, following the accelerated bookbuild offering ("ABO") made by Exor N.V. on February 26, 2025.
- (4) Relates to the deregistration of certain special voting shares under the Company's special voting shares terms and conditions.

The loyalty voting structure

The purpose of the loyalty voting structure is to reward ownership of the Company's common shares and to promote stability of the Company's shareholder base by granting long-term shareholders of the Company with special voting shares. Following the separation of Ferrari from the Stellantis Group (previously referred to as Fiat Chrysler Automobiles N.V. or FCA prior to the merger between FCA and Peugeot S.A. completed on January 16, 2021, which resulted in the creation of Stellantis N.V.) in 2016, Exor N.V. ("Exor") and Piero Ferrari participate in the Company's loyalty voting program and, therefore, effectively hold two votes for each of the common shares they hold. Investors who purchase common shares may elect to participate in the loyalty voting program by registering their common shares in the loyalty share register and holding them for three years. The loyalty voting program will be affected by means of the issue of special voting shares to eligible

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

holders of common shares. Each special voting share entitles the holder to exercise one vote at the Company's shareholder meetings. Only a minimal dividend accrues to the special voting shares allocated to a separate special dividend reserve, and the special voting shares do not carry any entitlement to any other reserve of the Group. The special voting shares have only immaterial economic entitlements and, as a result, do not impact the Company's earnings per share calculation.

Retained earnings and other reserves

Retained earnings and other reserves include:

- a share premium reserve of €5,768,544 thousand at December 31, 2025 (€5,768,544 thousand at December 31, 2024).
- a legal reserve of €83 thousand at December 31, 2025 and €110 thousand at December 31, 2024, determined in accordance with Dutch law.
- a treasury reserve of €3,071,083 thousand at December 31, 2025 and €2,285,756 thousand at December 31, 2024.
- a share-based compensation reserve of €41,791 thousand at December 31, 2025 and €45,793 thousand at December 31, 2024.

Following approval of the annual accounts by the shareholders at the Annual General Meeting of the Shareholders on April 16, 2025, a dividend distribution of €2.986 per outstanding common share was approved, corresponding to a total distribution of €532,158 thousand, which was paid in 2025. The distribution was made from the retained earnings reserve.

Following approval of the annual accounts by the shareholders at the Annual General Meeting of the Shareholders on April 17, 2024, a dividend distribution of €2.443 per outstanding common share was approved, corresponding to a total distribution of €439,918 thousand, which was paid in 2024. The distribution was made from the retained earnings reserve.

Following approval of the annual accounts by the shareholders at the Annual General Meeting of the Shareholders on April 14, 2023, a dividend distribution of €1.810 per outstanding common share was approved, corresponding to a total distribution of €328,631 thousand, which was paid in 2023. The distribution was made from the retained earnings reserve.

Transactions with non-controlling interests

With the exception of dividends paid to non-controlling interests, there were no transactions with non-controlling interests for the years ended December 31, 2025, 2024 or 2023.

Policies and processes for managing capital

The Group's objectives when managing capital are to create value for shareholders as a whole, safeguard business continuity and support the sustainable growth of the Group. As a result, the Group endeavors to maintain a satisfactory economic return for its shareholders and guarantee economic access to external sources of funds.

21. SHARE-BASED COMPENSATION

Equity incentive plans

The Group has several equity incentive plans under which a combination of performance share units (“PSUs”) and retention restricted share units (“RSUs”), which each represent the right to receive one Ferrari common share, have been awarded to the Executive Chairman, the Chief Executive Officer (“CEO”), members of the Ferrari Leadership Team (“FLT”) and other employees of the Group.

Equity Incentive Plan 2021-2023

In the first quarter of 2024, 41,338 2021-2023 PSU awards vested (representing 122 percent of the target PSU awards) as a result of the achievement of the related performance conditions and 29,550 2021-2023 RSU awards vested upon achievement of the related service conditions. As a result, 70,888 common shares, which were previously held in treasury, were assigned to participants of the plan in the first quarter of 2024. There are no further awards outstanding for the Equity Incentive Plan 2021-2023.

Equity Incentive Plan 2022-2024

In the first quarter of 2025, 91,414 2022-2024 PSU awards vested (representing 149 percent of the target PSU awards that remained outstanding at the time of vesting) as a result of the achievement of the related performance conditions and 21,437 2022-2024 RSU awards vested upon achievement of the related service conditions. As a result, 112,851 common shares, which were previously held in treasury, were assigned to participants of the plan in the first quarter of 2025. There are no further awards outstanding for the Equity Incentive Plan 2022-2024.

Equity Incentive Plan 2023-2025

Under the Equity Incentive Plan 2023-2025 approved in 2023, the Company awarded approximately 58 thousand 2023-2025 PSUs to the Executive Chairman, the CEO, the remaining members of the FLT and other employees of the Group, and approximately 22 thousand 2023-2025 RSUs to members of the FLT and other employees of the Group. These PSUs and RSUs cover the three-year performance and service periods from 2023 to 2025.

2023-2025 PSU awards

The vesting of the awards is based on the achievement of defined key performance indicators as follows:

- (i) TSR Target - 40 percent of the awards vest based on the achievement of the TSR ranking of Ferrari compared to an industry specific Peer Group of eleven companies;
- (ii) EBITDA Target - 40 percent of the awards vest based on the achievement of an EBITDA target determined by comparing Adjusted EBITDA to the Adjusted EBITDA targets derived from the Group’s business plan;
- (iii) ESG Target - 20 percent of the awards vest based on the achievement of defined objectives relating to environmental and social factors. In particular, 50 percent of the ESG Target is based on the reduction of CO₂ carbon emissions and 50 percent is based on the maintenance of the Equal Salary certification.

Each target is settled independently of the other targets.

In March 2026, 76,397 2023-2025 PSU awards are expected to vest (representing approximately 145 percent of the target PSU awards that remained outstanding at the time of vesting) as a result of the achievement of the related performance conditions and an equal number of common shares held in treasury will be assigned to participants of the plan, following which there will be no further 2023-2025 PSU awards outstanding.

2023-2025 RSU awards

In March 2026, 18,876 2023-2025 RSU awards are expected to vest as a result of the achievement of the related service condition, which is the recipient’s continued employment with the Company at the time of vesting, and an equal

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

number of common shares held in treasury will be assigned to participants of the plan, following which there will be no further 2023-2025 RSU awards outstanding.

Equity Incentive Plan 2024-2026

Under a new Equity Incentive Plan 2024-2026 approved in 2024, the Company awarded approximately 41 thousand 2024-2026 PSUs to the Executive Chairman, the CEO, members of the FLT and other employees of the Group, and approximately 15 thousand 2024-2026 RSUs to members of the FLT and other employees of the Group. The 2024-2026 PSUs and 2024-2026 RSUs cover the three-year performance and service periods from 2024 to 2026.

2024-2026 PSU awards

The vesting of the awards is based on the achievement of defined key performance indicators described below.

- (i) TSR Target - 40 percent of the awards vest based on the achievement of the TSR ranking of Ferrari compared to an industry specific Peer Group of eleven companies;
- (ii) EBITDA Target - 40 percent of the awards vest based on the achievement of an EBITDA target determined by comparing Adjusted EBITDA to the Adjusted EBITDA targets derived from the Group's business plan;
- (iii) ESG Target - 20 percent of the awards vest based on the achievement of defined objectives relating to environmental and social factors, with 50 percent of the ESG Target based on the reduction of CO₂ carbon emissions and 50 percent based on the maintenance of the Equal Salary certification.

Each target is settled independently of the other targets. The awards vest in 2027 and the total number of shares assigned upon vesting depends on the level of achievement of the targets.

2024-2026 RSU awards

The awards vest in 2027, subject to the recipient's continued employment with the Company at the time of vesting.

Equity Incentive Plan 2025-2027

Under a new Equity Incentive Plan 2025-2027 approved in 2025, the Company awarded approximately 33 thousand 2025-2027 PSUs to the Executive Chairman, the CEO, members of the FLT and other employees of the Group, and approximately 13 thousand 2025-2027 RSUs to members of the FLT and other employees of the Group. The 2025-2027 PSUs and 2025-2027 RSUs cover the three-year performance and service periods from 2025 to 2027.

2025-2027 PSU awards

The vesting of the awards is based on the achievement of defined key performance indicators described below.

- (i) TSR Target - 40 percent of the 2025-2027 PSUs vest based on the Company's TSR performance over the relevant performance period compared to the industry specific peer group presented below.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Ferrari TSR Ranking	% of Target Awards that Vest
1	175%
2	150%
3	125%
4	100%
5	75%
6	50%
>6	0%

The defined peer group (including Ferrari) for the TSR Target is presented below.

Ferrari	Aston Martin	Brunello Cucinelli	Burberry
Hermes	Kering	LVMH	Moncler
Prada	Porsche AG	Richemont	

- (ii) EBITDA Target - 40 percent of the 2025-2027 PSUS vest based on the achievement of an EBITDA target determined by comparing Adjusted EBITDA to the Adjusted EBITDA targets derived from the Group's business plan, as summarized below.

Actual Adjusted EBITDA Compared to Business Plan	% of Awards that Vest
+15%	175%
+10%	150%
+5%	125%
Business Plan Target	100%
-5%	75%
<-5%	—%

- (iii) ESG Target - 20 percent of the 2025-2027 PSUs vest based on the achievement of defined objectives relating to environmental and social factors, with 50 percent of the ESG Target based on the reduction of CO₂ carbon emissions and 50 percent based on the achievement of targets relating to female presence in sub-top positions.

Each target is settled independently of the other targets. The awards vest in 2027 and the total number of shares assigned upon vesting depends on the level of achievement of the targets.

2025-2027 RSU awards

The awards vest in 2028, subject to the recipient's continued employment with the Company at the time of vesting.

Supplemental information relating to the Equity Incentive Plan 2025-2027 is summarized below.

Fair value and key assumptions

The fair value of the PSUs and RSUs that were awarded under the Equity Incentive Plan 2025-2027, which is determined based on actuarial calculations that apply certain assumptions and take into consideration the specific characteristics of the awards granted, is summarized in the following table.

Equity Incentive Plan 2025-2027	
PSUs	€365.20
RSUs	€376.95

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

The fair value of the 2025-2027 PSU awards was measured at the grant date using a Monte Carlo Simulation model. The fair value of the 2025-2027 RSU awards was measured using the share price at the grant date adjusted for the present value of future distributions that the recipients will not receive during the vesting period.

The key assumptions utilized to calculate the grant date fair values of the PSUs that were awarded under the Equity Incentive Plan 2025-2027 are summarized below.

Equity Incentive Plan 2025-2027	
Grant date share price	€384.30
Expected volatility	25.43%
Dividend yield	0.64%
Risk-free rate	2.40%

The expected volatility was based on the observed volatility of the defined peer group. The risk-free rate was based on the iBoxx sovereign Eurozone yield.

Broad-based employee share ownership plan

In November 2023, the Company launched a broad-based employee share ownership plan under which each employee is given the option to become a shareholder of the Company, receiving a one-off grant of shares worth up to a maximum of approximately €2 thousand. If the employee holds the shares for at least 36 months, the Company will grant them an additional tranche of shares, from a minimum of one share and up to 15 percent of the value of the first allocation. In 2024, 24,715 share awards vested and the Company granted an additional 2,796 share awards. Starting in 2025, certain employees were given the opportunity, under specific conditions, to receive part of their “*Premio di Competitività*” in Company shares. In 2025, the Company made a grant of 2,055 share awards and 14,343 share awards vested under these arrangements.

Other share-based compensation

In 2023, 6,838 share awards granted to certain employees in 2022 and which each represent the right to receive one Ferrari common share, vested, while 1,309 awards and 279 awards were forfeited in 2023 and 2024, respectively. The fair value of the awards was equal to €203 per award, measured using the share price at the grant date adjusted for the present value of future distributions which the recipients will not receive during the vesting period.

The Company also provides share-based payments for services received as part of commercial agreements with certain suppliers.

Outstanding share awards

The following table presents the changes to the outstanding share awards under the Group’s share-based payment arrangements.

	PSU Awards	RSU Awards	Other Awards	Total Outstanding Awards
Balance at December 31, 2023	154,379	73,245	63,699	291,323

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Share-based compensation expense

The share based compensation expense recognized for the years ended December 31, 2025, 2024 and 2023 is presented below.

	For the years ended December 31,		
	2025	2024	2023
	(€ thousand)		
Equity incentive plans and other share-based awards	16,748	18,280	15,154
Commercial agreements with suppliers	4,260	4,813	4,563
Broad-based employee share ownership plan	6,538	875	10,222
Total share-based compensation expense	27,546	23,968	29,939

22. EMPLOYEE BENEFITS

A breakdown of provisions for employee benefits is presented below.

	At December 31,	
	2025	2024
	(€ thousand)	
Present value of defined benefit obligations for Italian employee severance indemnity (TFR)	12,494	13,446
Other provisions for employees	132,800	120,701
Total provisions for employee benefits	145,294	134,147

Defined contribution plans

The Group recognizes the cost for defined contribution plans over the period in which the employee renders service and classifies this by function in cost of sales, selling, general and administrative costs and research and development costs. The total income statement expense for defined contributions plans in the years ended December 31, 2025, 2024 and 2023 was €21,918 thousand, €21,324 thousand and €18,832 thousand, respectively.

Defined benefit obligations

Italian employee severance indemnity (TFR)

Trattamento di fine rapporto or “TFR” relates to the amounts that employees in Italy are entitled to receive when they leave the company and is calculated based on the period of employment and the taxable earnings of each employee. Under certain conditions the entitlement may be partially advanced to an employee during the employee’s working life.

The Italian legislation regarding this scheme was amended by Law 296 of 27 December 2006 and subsequent decrees and regulations issued in the first part of 2007. Under these amendments, companies with at least 50 employees are obliged to transfer the TFR to the “Treasury fund” managed by the Italian state-owned social security body (“INPS”) or to supplementary pension funds. Prior to the amendments, accruing TFR for employees of all Italian companies could be managed by the company itself. Consequently, the Italian companies’ obligation to INPS and the contributions to supplementary pension funds take the form, under IAS 19 revised, of “Defined contribution plans” whereas the amounts recorded in the provision for employee severance pay retain the nature of “Defined benefit plans”. Accordingly, the provision for employee severance indemnity in Italy consists of the residual obligation for TFR until December 31, 2006. This is an unfunded defined benefit plan as the benefits have already been almost entirely earned, with the sole exception of future revaluations. Since 2007 the scheme has been classified as a defined contribution plan, and the Group recognizes the associated cost, being the required contributions to the pension funds, over the period in which the employee renders service.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Changes in the defined benefit obligations relating to the TFR liability are summarized below.

	Total
Amounts at December 31, 2023	13,903
Recognized in the consolidated income statement	467
Recognized in other comprehensive income/loss (*)	691
Benefits paid	(1,615)
Amounts at December 31, 2024	13,446
Recognized in the consolidated income statement	590
Recognized in other comprehensive income/loss (*)	(135)
Benefits paid	(1,407)
Amounts at December 31, 2025	12,494

(*) Relates to actuarial (gains)/losses from financial assumptions.

A breakdown of amounts recognized in the consolidated income statement relating to the TFR liability is presented below.

	For the years ended December 31,		
	2025	2024	2023
	(€ thousand)		
Interest expense	590	467	518
Total recognized in the consolidated income statement	590	467	518

The discount rates used for the measurement of the Italian TFR obligation are based on yields of high-quality (AA-rated) fixed income securities for which the timing and amounts of payments match the timing and amounts of the projected benefit payments. For this plan, the single weighted average discount rate that reflects the estimated timing and amount of the scheme future benefit payments for 2025 is equal to 3.5 percent (3.4 percent in 2024 and 4.1 percent in 2023). The average duration of the Italian TFR was approximately 6 years at December 31, 2025 (6 years at December 31, 2024 and 2023). Retirement or employee leaving rates are developed to reflect actual and projected Group experience and legal requirements for retirement in Italy.

Current service cost is recognized by function in cost of sales, selling, general and administrative costs or research and development costs.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

The expected future benefit payments for the defined benefit obligations (Italian TFR obligation) as of December 31, 2025 are presented below.

	(€ thousand)
2026	1,631
2027	1,818
2028	1,646
2029	1,430
2031 - 2035	7,670
Total	14,195

The sensitivity of the defined benefit obligations to changes in the weighted principal assumptions is presented below.

	At December 31,			
	2025		2024	
	Changes in assumption of +1% discount rate	Changes in assumption of -1% discount rate	Changes in assumption of +1% discount rate	Changes in assumption of -1% discount rate
	(€ thousand)			
Impact on defined benefit obligation	(654)	724	(736)	819

The above sensitivity analysis is based on an assumed change in the discount rate while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method has been applied as when calculating the defined benefit liability recognized in the statement of the financial position.

Other provisions for employees

Other provisions for employees consist of the expected future amounts payable to employees in connection with other remuneration schemes, which are not subject to actuarial valuation, including long-term bonus plans.

At December 31, 2025, other provisions for employees comprised short-term bonus benefits amounting to €128,652 thousand (€116,671 thousand at December 31, 2024) and other benefits amounting to €4,148 thousand (€4,030 thousand at December 31, 2024), primarily relating to jubilee benefits granted to certain employees in recognition of time served with the Group.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

23. PROVISIONS

Movements in provisions are presented below.

	At December 31, 2024	Additional provisions	Utilization	Releases	Translation differences	Reclassification and other movements	At December 31, 2025
	(€ thousand)						
Warranty and recall campaigns provision	152,178	67,613	(58,753)	(22,987)	(1,255)	—	136,796
Legal proceedings and disputes	11,899	7,311	(4,951)	(796)	(387)	(155)	12,921
Environmental and other risks	42,135	19,738	(8,277)	(16,412)	(846)	(1,574)	34,764
Total provisions	206,212	94,662	(71,981)	(40,195)	(2,488)	(1,729)	184,481

Warranty and recall campaigns

The provision for warranty and recall campaigns represents the best estimate of commitments given by the Group for contractual, legal, or constructive obligations arising from product warranties given for a specified period of time.

Legal proceedings and disputes

The provision for legal proceedings and disputes represents management's best estimate of the expenditures expected to be required to settle or otherwise resolve legal proceedings and disputes. This class of claims relates to allegations by contractual counterparties that the Group has violated the terms of the arrangements, including by terminating the applicable relationships. Judgments in these proceedings may be issued in 2026 or beyond, although any such judgments may remain subject to ongoing judicial review. While the outcome of these proceedings is uncertain, any losses in excess of the provisions recorded are not expected to be material to the Group's financial condition or results of operations.

Environmental and other risks

The provision for environmental and other risks primarily relates to environmental risks, including those relating to emissions regulations, as well as to disputes and matters which are not subject to legal proceedings, including disputes with suppliers, distributors, employees and other parties.

The following table presents where the additional provisions to environmental and other risks recognized for the years ended December 31, 2025, 2024 and 2023 were recorded within the consolidated income statement.

	For the years ended December 31,		
	2025	2024	2023
	(€ thousand)		
Recorded in the consolidated income statement within:			
Cost of sales	17,874	14,136	25,128
Selling, general and administrative costs	1,864	580	1,398
Total	19,738	14,716	26,526

(*) As reported in the consolidated statement of financial position.

Asset-backed financing (Securitizations)

As a means of diversifying its sources of funds, the Group sells certain of its receivables originated by its financial services activities in the United States through asset-backed financing or securitization programs (the terms asset-backed financing and securitization programs are used synonymously throughout this document), without transferring the risks typically associated with the related receivables. As a result, the receivables sold through securitization programs are still consolidated until collection from the customer. The securitization agreements for both programs require the maintenance of hedging through interest rate cap derivatives.

Details relating to the revolving securitization programs are presented below.

Program	Funding Limit (2)	Amount Outstanding at December 31, 2025	Amount Outstanding at December 31, 2024	Maturity Date
	(\$ million)	(\$ million)	(\$ million)	
Syndicated program (retail) ⁽¹⁾	1,050	1,038	974	December 2026
Program lease/retail ⁽¹⁾	525	475	420	November 2027
Total asset-backed financing (Securitizations)	1,575	1,513	1,394	

(1) At December 31, 2025 the notes relating to the retail securitization program bore interest at a rate per annum equal to the aggregate of a synthetic base rate substantially replicating the LIBOR plus a margin of 79 basis points and the notes relating to the leasing/retail securitization program bore interest at a rate per annum equal to the aggregate of SOFR plus a margin of 70 basis points.

(2) Excluding accrued interest.

Cash collected from the settlement of receivables under securitization programs is subject to certain restrictions regarding its use and is primarily applied to repay principal and interest on the related asset-backed financing. This cash amounted to €54,434 thousand at December 31, 2025 (€53,644 thousand at December 31, 2024).

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Bonds and notes

2025 Bond

On May 27, 2025, the Company fully repaid the 2025 Bond for a total consideration of €457,727 thousand (including accrued interest). The bond was previously issued on May 27, 2020 for a principal of €650 million at a coupon of 1.5 percent and due on May 2025. Following a cash tender offer in July 2023, the Group accepted for purchase valid tenders of the 2025 Bond for an aggregate nominal amount of €199,037 thousand at a purchase price of €191,097 thousand, resulting in gains of €7,940 thousand, which were recognized within financial income. The amount outstanding at December 31, 2024 was €454,449 thousand, including accrued interest of €4,059 thousand.

2030 Bond

On May 21, 2024, the Company issued 3.625 percent senior notes due May 2030 (“2030 Bond”) having a principal of €500 million. The notes were issued at a discount for an issue price of 99.677 percent, resulting in net proceeds of €496,145 thousand, after related expenses, and a yield to maturity of 3.686 percent. The bond was admitted to trading on the regulated market of Euronext Dublin. The proceeds from the 2030 Bond are intended to be used for general corporate purposes. The amount outstanding of the 2030 Bond December 31, 2025 was €508,225 thousand, including accrued interest of €11,121 thousand (€507,678 thousand including accrued interest of €11,173 thousand at December 31, 2024).

2029 and 2031 Notes

On July 31, 2019, the Company issued 1.12 percent senior notes due August 2029 (“2029 Notes”) and 1.27 percent senior notes due August 2031 (“2031 Notes”) through a private placement to certain U.S. institutional investors, each having a principal of €150 million. The net proceeds from the issuances amounted to €298,316 thousand and the yields to maturity on an annual basis equal the nominal coupon rates of the notes. The 2029 Notes and the 2031 Notes are primarily used for general corporate purposes, including the funding of capital expenditures.

The amount outstanding of the 2029 Notes at December 31, 2025 was €150,395 thousand, including accrued interest of €694 thousand (€150,302 thousand, including accrued interest of €700 thousand at December 31, 2024). The amount outstanding of the 2031 Notes at December 31, 2025 was €150,378 thousand, including accrued interest of €787 thousand (€150,315 thousand including accrued interest of €794 thousand at December 31, 2024).

2032 Notes

On July 29, 2021, the Company issued 0.91 percent senior notes due January 2032 (“2032 Notes”) through a private placement to certain U.S. institutional investors having a principal of €150 million. The net proceeds from the issuance amounted to €149,495 thousand and the yield to maturity on an annual basis equals the nominal coupon rates of the notes. The 2032 Notes are used for general corporate purposes. The amount outstanding of the 2032 Notes at December 31, 2025 was €150,277 thousand, including accrued interest of €576 thousand (€150,229 thousand, including accrued interest of €576 thousand at December 31, 2024).

The aforementioned bonds and notes impose covenants on Ferrari including: (i) negative pledge clauses which require that, in case any security interest upon assets of Ferrari is granted in connection with other notes or debt securities with the consent of Ferrari are, or are intended to be, listed, such security should be equally and ratably extended to the outstanding notes, subject to certain permitted exceptions; (ii) pari passu clauses, under which the notes rank and will rank pari passu with all other present and future unsubordinated and unsecured obligations of Ferrari; (iii) events of default for failure to pay principal or interest or comply with other obligations under the notes with specified cure periods or in the event of a payment default or acceleration of indebtedness or in the case of certain bankruptcy events, and (iv) other clauses that are customarily applicable to debt securities of issuers with a similar credit standing. A breach of these covenants may require the early repayment of the notes. At December 31, 2025 and 2024, Ferrari was in compliance with the covenants of the bonds and notes.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Borrowings from banks and other financial institutions

Information relating to borrowings from banks and other financial institutions is presented below.

Borrowing Entity	Currency	Amount Outstanding at December 31,		Maturity Date
		2025	2024	
(€ thousand)				
Ferrari NV ⁽¹⁾	EUR	37,970	84,115	January 2026 ⁽⁴⁾
Ferrari NV ⁽¹⁾	EUR	8,336	41,682	March 2026
Ferrari NV ⁽¹⁾	EUR	100,452	—	April 2026
Ferrari NV ⁽¹⁾	EUR	75,361	75,497	January 2027
Ferrari NV ⁽¹⁾	EUR	150,130	150,143	December 2028
Ferrari Financial Services, Inc. ⁽²⁾	USD	55,769	63,181	April 2026
Ferrari SpA ⁽³⁾	EUR	3	15	
Total borrowings from banks and other financial institutions		428,021	414,633	

(1) Term loans bearing an average interest rate of 2.6593 percent as of December 31, 2025.

(2) Financial liabilities of FFS Inc to support financial services activities bearing interest at SOFR plus 83 basis points.

(3) At December 31, 2024 relates to an amortized term loan repaid in June 2025. At December 31, 2025 relates to banking fees and interest.

(4) The amount was fully repaid in January 2026.

Lease liabilities

The Group recognizes lease liabilities in relation to right-of-use assets in accordance with IFRS 16 - *Leases*. At December 31, 2025 lease liabilities amounted to €162,147 thousand (€126,270 thousand at December 31, 2024).

Other debt

Other debt mainly relates to U.S. based financial service activities with specific reference to expected cash out for new funding request as per contractual commitment.

Committed credit lines

At December 31, 2025, the Group had total committed credit lines available and undrawn amounting to €550 million and with maturities ranging from 2026 to 2030 (€550 million at December 31, 2024).

25. OTHER LIABILITIES

A breakdown of other liabilities is presented below.

	At December 31,	
	2025	2024
(€ thousand)		
Advances and security deposits	774,535	553,771
Deferred income	424,589	335,524
Accrued expenses	78,926	100,314
Payables to personnel	46,998	43,110
Social security payables	30,759	28,532
Other	35,809	44,970
Total other liabilities	1,391,616	1,106,221

Advances and security deposits mainly include advances received from customers for the purchase of Ferrari cars, mainly for Icona, Supercar, Special Series and other limited edition models, as well as certain Range models in selected markets. The advances are recognized in net revenues when the cars are shipped.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Deferred income primarily includes amounts received under maintenance and power warranty programs of €340,779 thousand at December 31, 2025 and €300,599 thousand at December 31, 2024, which are deferred and recognized as net revenues over the length of the maintenance program. Of the total liability related to maintenance and power warranty programs at December 31, 2025, the Group expects to recognize in net revenues approximately €96 million in 2026, €77 million in 2027, €56 million in 2028 and €112 million in periods subsequent to 2028. Deferred income also includes amounts collected under various other agreements that are dependent upon the future performance of a service or other act of the Group, primarily for Formula 1 sponsorship agreements.

Changes in contract liabilities for advances received from customers for cars and maintenance and power warranty programs are presented below.

	At December 31, 2024	Additional amounts arising during the period	Amounts recognized within revenue (€ thousand)	Other changes	At December 31, 2025
Advances from customers	547,345	1,617,385	(1,396,290)	205	768,645
Maintenance and power warranty programs	300,599	151,702	(111,695)	173	340,779

	At December 31, 2023	Additional amounts arising during the period	Amounts recognized within revenue (€ thousand)	Other changes	At December 31, 2024
Advances from customers	510,625	981,694	(945,687)	713	547,345
Maintenance and power warranty programs	262,644	136,420	(98,393)	(72)	300,599

26. TRADE PAYABLES

Trade payables of €841,256 thousand at December 31, 2025 (€945,657 thousands at December 31, 2024) are entirely due within one year. The carrying amount of trade payables is considered to be equivalent to their fair value.

27. FAIR VALUE MEASUREMENT

IFRS 13 — *Fair Value Measurement* establishes a three level hierarchy for the inputs to the valuation techniques used to measure fair value by giving the highest priority to quoted prices (unadjusted) in active markets for identical assets and liabilities (level 1 inputs) and the lowest priority to unobservable inputs (level 3 inputs). In some cases, the inputs used to measure the fair value of an asset or a liability might be categorized within different levels of the fair value hierarchy. In those cases, the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy at the lowest level input that is significant to the entire measurement.

Levels used in the hierarchy are as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets and liabilities that the Group can access at the measurement date.

Level 2 inputs are inputs other than quoted prices included within level 1 that are observable for the assets or liabilities, either directly or indirectly.

Level 3 inputs are unobservable inputs for the assets and liabilities.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Assets and liabilities that are measured at fair value on a recurring basis

The fair value hierarchy for financial assets and liabilities that are measured at fair value on a recurring basis is presented below.

	Note	At December 31, 2025			
		Level 1	Level 2	Level 3	Total
		(€ thousand)			
Investments and other financial assets	16	17,937	—	—	17,937
Current financial assets	19	—	73,664	—	73,664
Total assets		17,937	73,664	—	91,601
Other financial liabilities	19	—	7,405	—	7,405
Total liabilities		—	7,405	—	7,405

	Note	At December 31, 2024			
		Level 1	Level 2	Level 3	Total
		(€ thousand)			
Investments and other financial assets	16	16,897	—	—	16,897
Current financial assets	19	—	19,350	—	19,350
Total assets		16,897	19,350	—	36,247
Other financial liabilities	19	—	61,894	—	61,894
Total liabilities		—	61,894	—	61,894

There were no transfers between fair value hierarchy levels for the periods presented.

The fair value of current financial assets and other financial liabilities relates to derivative financial instruments and is measured by taking into consideration market parameters at the balance sheet date, using widely accepted valuation techniques. In particular, the fair value of foreign currency derivatives (forward contracts, currency swaps and options and interest rate caps) is determined by taking the prevailing foreign currency exchange rates and interest rates, as applicable, at the reporting date.

The par value of cash and cash equivalents usually approximates fair value due to the short maturity of these instruments, which consist primarily of current bank accounts.

Assets and liabilities not measured at fair value on a recurring basis

For financial instruments represented by short-term receivables and payables, for which the present value of future cash flows does not differ significantly from carrying value, the Group assumes that carrying value is a reasonable approximation of the fair value. In particular, the carrying amount of current receivables and other current assets and of trade payables and other liabilities approximates their fair value.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

The carrying amount and the fair value for the most relevant categories of financial assets and financial liabilities not measured at fair value on a recurring basis is presented below.

		At December 31,			
		2025		2024	
	Note	Carrying amount	Fair Value	Carrying amount	Fair Value
(€ thousand)					
Receivables from financing activities	18	1,613,396	1,613,396	1,661,632	1,661,632
Debt	24	2,884,220	2,885,085	3,351,888	3,348,721

The Group has determined that the carrying amount of the majority of its debt approximates its fair value since either (i) the interest payable on the debt is close to current market rates, and/or (ii) the debt is of a short-term nature. The only exception is the Group's debt that is publicly listed for which the fair value is based on quoted market prices.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

28. RELATED PARTY TRANSACTIONS

Pursuant to IAS 24 — *Related Party Disclosures* (“IAS 24”), the related parties of Ferrari include Exor N.V. and together with its subsidiaries the Exor Group, as well as all entities and individuals capable of exercising control, joint control or significant influence over the Company and its subsidiaries. Related parties also include companies over which the Exor Group is capable of exercising control, joint control or significant influence, including Stellantis N.V., and together with its subsidiaries the Stellantis Group, and CNH Industrial N.V. and its subsidiaries, as well as joint ventures and associates of Ferrari. In addition, members of the Ferrari Board of Directors and executives with strategic responsibilities and their families are also considered related parties.

The Group carries out transactions with related parties on commercial terms that are normal in the respective markets, considering the characteristics of the goods or services involved. Transactions carried out by the Group with these related parties are primarily of a commercial nature and, in particular, these transactions relate to:

Transactions with Stellantis Group companies

- transactions with Stellantis Group companies relating to technical cooperation agreements with the aim to enhance the quality and competitiveness of the parties’ products while reducing costs and investments, as well as for certain services received by Stellantis Group companies, mainly of an administrative nature;
- the sale of engines to Maserati S.p.A. (“Maserati”) and the purchase of engine components for the use in the production of Maserati engines from FCA US LLC. The contract with Maserati expired in December 2023 and residual sales occurred throughout 2024.

Transactions with Stellantis Group companies for the periods presented include transactions with FCA Bank until April 1, 2023. Following the sale by the Stellantis Group of its 50 percent ownership interest in FCA Bank to Crédit Agricole Consumer Finance S.A., FCA Bank (which was renamed CA Auto Bank) is now wholly owned by Crédit Agricole Consumer Finance S.A. and is no longer a related party of Ferrari.

Transactions with Exor Group companies (excluding Stellantis Group companies)

- the Group incurs rental costs from Iveco S.p.A. (a company belonging to Iveco Group) for the rental of trucks used by the Scuderia Ferrari racing team;
- the Group earns sponsorship revenue from Iveco S.p.A.

Transactions with other related parties

- the purchase of components for Formula 1 racing cars from COXA S.p.A.;
- consultancy services provided by HPE S.r.l.;
- sponsorship agreement relating to Formula 1 activities with Ferretti S.p.A.;
- sale of cars to certain members of the Board of Directors of Ferrari N.V. and Exor.

In accordance with IAS 24, transactions with related parties also include compensation to Directors and managers with strategic responsibilities.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

A summary of transactions with related parties recognized in the consolidated income statement is presented below.

	For the years ended December 31,								
	2025			2024			2023		
	Net revenues	Costs ⁽¹⁾	Financial expenses, net	Net revenues	Costs ⁽¹⁾	Financial expenses/ (income), net	Net revenues	Costs ⁽¹⁾	Financial expenses, net

At December 31, 2025 and at December 31, 2024 there were no financial assets or financial liabilities with related parties.

Emoluments to Directors and Key Management

Compensation to the Directors of Ferrari N.V. are presented below.

	For the years ended December 31,		
	2025	2024	2023
	(€ thousand)		
Directors of Ferrari N.V.	14,139	11,331	9,791

The aggregate compensation to Directors of Ferrari N.V. for year ended December 31, 2025 was €14,139 thousand (€11,331 thousand in 2024 and €9,791 thousand in 2023), inclusive of the following:

- €9,911 thousand for salary and other short-term benefits, including short-term incentives (€6,936 thousand in 2024 and €6,688 thousand in 2023);
- €288 thousand for pension benefits (€230 thousand in 2024 and 2023), and
- €3,940 thousand for share-based compensation awarded under the Company's equity incentive plans and other share-based payments (€4,165 thousand in 2024 and €2,873 thousand in 2023). For additional information relating to the Company's equity incentive plans, see Note 21 "*Share-based compensation*". There was no equity-settled compensation for Non-Executive Directors for the years ended December 31, 2025, 2024 and 2023.

The aggregate compensation for members of the FLT (excluding the CEO) in 2025 was €24,708 thousand (€29,292 thousand in 2024 and €39,131 thousand in 2023), inclusive of the following:

- €18,826 thousand for salary and other short-term benefits, including short-term incentives (€23,146 thousand in 2024 and €34,107 thousand in 2023);
- €5,140 thousand for share-based compensation awarded under the Company's equity incentive plans (€5,464 thousand in 2024 and €4,479 thousand in 2023), and
- €742 thousand for pension contributions (€682 thousand in 2024 and €545 thousand in 2023).

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

29. COMMITMENTS

Arrangements with key suppliers

From time to time, in the ordinary course of business, the Group enters into various arrangements with key third party suppliers in order to establish strategic and technological advantages. A limited number of these arrangements contain unconditional purchase obligations to purchase a fixed or minimum quantity of goods and/or services with fixed and determinable price provisions.

Arrangements with sponsors

Certain of the Group's sponsorship contracts include terms whereby the Group is obligated to purchase a minimum quantity of goods and/or services from its sponsors.

Future minimum purchase obligations under these supplier and sponsorship arrangements at December 31, 2025 are presented below.

At December 31, 2025				
	Due within one year	Due between one and three years	Due between three and five years	Due beyond five years
	Total			
	(€ thousand)			
Minimum purchase obligations	158,131	107,059	73,857	334
	339,381			

Lease agreements

For information relating to future aggregate minimum lease payments under lease contracts, which primarily relate to the lease of stores and industrial buildings, see Note 24 "*Debt—Contractual undiscounted cash flows*".

30. QUALITATIVE AND QUANTITATIVE INFORMATION ON FINANCIAL RISKS

The Group is exposed to the following financial risks connected with its operations:

- Financial market risk — Principally relating to foreign currency exchange rates as the Group operates internationally in different currencies and, to a lesser extent, interest rates and commodity prices;
- Liquidity risk — With particular reference to the availability of funds and access to the credit markets, should the Group require them, and to financial instruments in general;
- Credit risk — Arises from normal commercial relations with dealers, sponsors, licensees and final clients, as well as the Group's financing activities.

These risks could significantly affect the Group's financial position, results of operations and cash flows, and for this reason the Group identifies and monitors these risks, in order to detect potential negative effects in advance and take the necessary action to mitigate them, primarily through the Group's operating and financing activities and if required, through the use of derivative financial instruments.

The following section provides qualitative and quantitative disclosures on the effect that these risks may have upon the Group. The quantitative data reported in the following section does not have any predictive value. In particular, the sensitivity analysis on financial market risks does not reflect the complexity of the market or the reaction which may result from any changes that are assumed to take place.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Financial market risks

Due to the nature of the Group's business, the Group is exposed to a variety of market risks, including foreign currency exchange rate risk and to a lesser extent, interest rate risk and commodity price risk.

The Group's exposure to foreign currency exchange rate risk arises from the geographic distribution of the Group's shipments, as the Group generally sells its models in the currencies of the various markets in which the Group operates, while the Group's industrial activities are all based in Italy, and primarily denominated in Euro.

The Group's exposure to interest rate risk arises from the need to fund certain activities and the necessity to deploy surplus funds. Changes in market interest rates may have the effect of either increasing or decreasing the Group's net profit/(loss), thereby indirectly affecting the costs and returns of financing and investing transactions.

The Group has in place various risk management policies, which primarily relate to foreign exchange and commodity price, interest rate and liquidity risks. The Group's risk management policies permit derivatives to be used for managing such exposures at risk. Counterparties to these agreements are major financial institutions. Derivative financial instruments can only be executed for hedging purposes.

In particular, the Group used derivative financial instruments as cash flow hedges primarily for the purpose of limiting the negative impact of foreign currency exchange rate fluctuations on forecasted transactions denominated in foreign currencies. Accordingly, as a result of applying risk management policies with respect to foreign currency exchange exposure, the Group's results of operations have not been fully exposed to fluctuations in foreign currency exchange rates. However, despite these risk management policies and hedging transactions, sudden adverse movements in foreign currency exchange rates could have a significant effect on the Group's earnings and cash flows.

The Group also enters into interest rate caps as required by certain of its securitization agreements.

Information on the fair value of derivative financial instruments held is provided in Note 19.

Information on foreign currency exchange rate risk

The Group is exposed to risks resulting from changes in foreign currency exchange rates, which can affect its earnings and equity. In particular:

- Where a Group company incurs costs in a currency different from that of its revenues, any change in foreign currency exchange rates can affect the operating results of that company. In 2025, the total trade flows exposed to foreign currency exchange rate risk amounted to the equivalent of 52 percent of the Group's net revenues (59 percent in 2024 and 60 percent in 2023).
- The main foreign currency exchange rate to which the Group is exposed is the Euro/U.S. Dollar for sales in U.S. Dollar in the United States and other markets where the U.S. Dollar is the reference currency. In 2025, the value of commercial activities exposed to fluctuations in the Euro/U.S. Dollar exchange rate accounted for approximately 59 percent (61 percent in 2024 and 57 percent in 2023) of the total currency risk from commercial activities. In 2025 the commercial activities exposed to the Euro/Japanese Yen exchange rate exceeded 10 percent (as in 2024, while in 2023 both the Euro/Chinese Renminbi exchange rate and the Euro/Japanese Yen exchange rate exceeded 10 percent) of the total currency risk from commercial activities. Other significant exposures included the exchange rate between the Euro and the following currencies: Chinese Renminbi, Pound Sterling, Swiss Franc, Canadian Dollar and Australian Dollar. None of these exposures, taken individually, exceeded 10 percent of the Group's total foreign currency exchange rate exposure for commercial activities in 2025, 2024 and 2023 (apart from Chinese Renminbi in 2023).
- Several subsidiaries are located in countries that are outside the Eurozone, in particular the United States, Japan, China, Australia and South Korea. As the Group's reporting currency is the Euro, the income statements of those companies are translated into Euro using the average exchange rate for the period and, even if revenues and margins are unchanged in local currency, changes in exchange rates can impact the amount of revenues, costs and profit as translated into Euro.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

- The amount of assets and liabilities of consolidated companies that report in a currency other than the Euro may vary from period to period as a result of changes in exchange rates. The effects of these changes are recognized directly in equity as a component of other comprehensive income/(loss) under gains/(losses) from currency translation differences.

Exchange differences arising on the settlement of monetary items or on reporting monetary items at rates different from those at which they were initially recorded during the period or in previous financial statements, are recognized in the consolidated income statement within financial income or financial expenses or as cost of sales for charges arising from financial services companies.

It is the Group's policy to use derivative financial instruments (primarily forward currency contracts and currency options) to hedge up to 90 percent of the principal exposures to foreign currency transaction exchange risk, typically for a period of up to twelve months.

The Group monitors its principal exposure to foreign currency translation exchange risk, although the Group did not engage in any specific hedging activities in relation to translation exchange risk for the periods presented.

The impact of foreign currency exchange rate differences recorded within financial income or financial expenses for the year ended December 31, 2025, including the costs of hedging foreign currency exchange rate risk, amounted to net losses of €38,160 thousand (net losses of €7,035 thousand and €20,197 thousand for the years ended December 31, 2024 and 2023, respectively).

All of the Group's financial services activities are conducted in the functional currencies of the related financial services companies, therefore the impact of foreign currency exchange rate differences arising from financial services activities was zero in all periods presented.

Except as noted above, there have been no substantial changes in 2025 in the nature or structure of exposure to foreign currency exchange rate risks or in the Group's hedging policies.

The potential decrease in fair value of derivative financial instruments held by the Group at December 31, 2025 to hedge against foreign currency exchange rate risks, which would arise in the case of a hypothetical, immediate and adverse change of 10 percent in the exchange rates of the major foreign currencies with the Euro, would be approximately €213,867 thousand (€171,437 thousand at December 31, 2024). Receivables, payables and future trade flows for which hedges have been put in place were not included in the analysis. It is reasonable to assume that changes in foreign currency exchange rates will produce the opposite effect, of an equal or greater amount, on the underlying transactions that have been hedged. The sensitivity analysis is based on currency hedging in place at the end of the period, which can vary during the period and assumes unchanged market conditions other than exchange rates, such as volatility and interest rates. For this reason, it is purely indicative.

Information on interest rate risk

The Group's exposure to interest rate risk, though less significant, arises from the need to fund financial services activities and the necessity to deploy surplus funds. Changes in market interest rates may have the effect of either increasing or decreasing the Group's net profit/(loss), thereby indirectly affecting the costs and returns of financing and investing transactions.

The Group's most significant floating rate financial assets at December 31, 2025 were cash and cash equivalents and certain receivables from client financing activities, while 54 percent of the Group's gross debt bears floating rates of interest (48 percent at December 31, 2024). At December 31, 2025, a decrease of 25 basis points in interest rates on floating rate financial assets and debt, with all other variables held constant, would have resulted in a decrease in profit before taxes of €73 thousand on an annual basis (a decrease of €648 thousand at December 31, 2024 for a decrease of 25 basis points in interest rates). The analysis is based on the assumption that floating rate financial assets and debt which expire during the projected 12-month period will be renewed or reinvested in similar instruments, bearing the hypothetical short-term interest rates.

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Information on commodity price risk

The Group's exposure to commodity price risk, though much less significant than foreign exchange rate risk and interest rate risk, arises from the need to use a variety of raw materials in the Group's operations, including aluminum and precious metals such as palladium and rhodium. The Group monitors its exposure to commodity price risk and may hedge a portion of such exposure through derivative financial instruments (primarily commodity swaps).

Liquidity risk

Liquidity risk arises if the Group is unable to obtain the funds needed to carry out its operations and meet its obligations. The main determinant of the Group's liquidity position is the cash generated by or used in operating and investing activities.

From an operating point of view, the Group manages liquidity risk by monitoring cash flows and keeping an adequate level of funds readily available. The main funding operations and investments in cash and marketable securities of the Group are centrally managed or supervised by the treasury department with the aim of ensuring effective and efficient management of the Group's liquidity. The Group has established various policies which are managed or supervised centrally by the treasury department with the purpose of optimizing the management of funds and reducing liquidity risk which include:

- centralizing liquidity management through the use of cash pooling arrangements;
- maintaining a conservative level of available liquidity;
- obtaining adequate credit lines and diversifying sources of funding;
- maintaining a portfolio of high-quality liquid assets;
- monitoring future liquidity requirements on the basis of business planning.

Intercompany financing between Group entities is not restricted other than through the application of covenants requiring that transactions with related parties be conducted at arm's length terms.

Details on the maturity profile of the Group's financial assets and liabilities and on the structure of derivative financial instruments are provided in Notes 19 and 24. Details of the repayment of derivative financial instruments are provided in Note 19.

To preventively and prudently manage potential liquidity or refinancing risks in the foreseeable future, the Group has secured available undrawn committed credit lines, which amounted to €550 million at both December 31, 2025 and 2024.

The Group believes that its total available liquidity (defined as cash and cash equivalents plus undrawn committed credit lines), in addition to funds that will be generated from operating activities, will enable Ferrari to appropriately and adequately satisfy the requirements of its operational activities, including working capital needs, and its investing activities, as well as to fulfill its obligations to repay its debts and ensure an appropriate level of strategic and operational flexibility. The Group therefore believes there is no significant risk of a lack of liquidity. For information relating to the Group's total available liquidity, see Note 32 "*Cash and Cash Equivalents and Notes to the Consolidated Statement of Cash Flows*".

Credit risk

Credit risk is the risk of economic loss arising from the failure to fully collect receivables. Credit risk encompasses the direct risk of default and the risk of a deterioration of the creditworthiness of the counterparty.

The maximum credit risk to which the Group is theoretically exposed at December 31, 2025 is represented by the carrying amounts of the financial assets presented in the consolidated statement of financial position sheet and the nominal value of the guarantees provided.

Dealers, clients and, in general, Ferrari's business partners are subject to a specific evaluation of their creditworthiness. Additionally, it is Group practice to obtain financial guarantees against risks associated with credit granted

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

for the purchase of cars and parts, as well as certain sponsorships and licensees. These guarantees are further strengthened, where possible, by retaining title on cars subject to financing agreements.

Credit positions of material significance are evaluated on an individual basis. Where objective evidence exists that they are uncollectible, in whole or in part, specific write-downs are recognized. The amount of the write-down is based on an estimate of the recoverable cash flows, the timing of those cash flows, the cost of recovery and the fair value of any guarantees received.

Receivables from financing activities relate entirely to the financial services portfolio in the United States and such receivables are generally secured on the titles of cars or other guarantees. Receivables from financing activities amounting to €1,613,396 thousand at December 31, 2025 (€1,661,632 thousand at December 31, 2024) are shown net of the allowance for doubtful accounts amounting to €18,742 thousand (€16,547 thousand at December 31, 2024). After considering the allowance for doubtful accounts, €104,581 thousand of receivables were overdue (€107,203 thousand at December 31, 2024), where receivables are considered overdue if a counterparty has failed to make at least one contractual payment by the respective due date. Therefore, overdue receivables represent a minor portion of receivables from financing activities.

Trade receivables amounting to €360,339 thousand at December 31, 2025 (€349,176 thousand at December 31, 2024) are shown net of the allowance for doubtful accounts amounting to €36,238 thousand (€33,376 thousand at December 31, 2024). After considering the allowance for doubtful accounts, €42,319 thousand of receivables were overdue (€47,151 thousand at December 31, 2024).

The Group's cash and cash equivalents are held on bank and deposit accounts with primary financial institutions and highly rated money market funds. It is the Ferrari Group's policy to continuously monitor counterparty risk and limit concentration of bank and deposit accounts to a maximum of 25% of the total with a single financial counterpart. With specific reference to money market funds, the invested amounts in any specific fund must not exceed 10% of the par value of such. The Group considers its credit risk with respect to its cash and cash equivalents to be low considering that they are held with primary financial institutions and the maximum exposure with any one counterparty is limited.

Cash flow forecasting is performed by the Group on a recurring basis. The Group monitors a rolling forecast of its liquidity requirements to ensure an adequate cash balance to meet operational needs and maintain adequate headroom. Cash held by the businesses over and above balances required for working capital management is loaned to the Group's centralized treasury department. Cash is invested in instant-access current accounts, short-term deposits and money market funds, choosing instruments with appropriate maturities to provide adequate headroom as determined by cash forecasts. In accordance to Group liquidity risk management policy, the Group controls counterparties' credit risk and credit limit utilization. It adopts a conservative approach to the investment of its cash which is deposited with financial institutions with high credit standing.

For information relating to the short-term credit rating of the Group's cash and cash equivalents, see Note 32 "*Cash and Cash Equivalents and Notes to the Consolidated Statement of Cash Flows*".

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

32. CASH AND CASH EQUIVALENTS AND NOTES TO THE CONSOLIDATED STATEMENT OF CASH FLOWS

Cash and cash equivalents

A breakdown of cash and cash equivalents is presented below.

	At December 31,	
	2025	2024
	(€ thousand)	
Cash and bank balances	1,467,711	1,742,214
Cash and cash equivalents	1,467,711	1,742,214

At December 31, 2025, cash and cash equivalents included €370,000 thousand relating to time deposits held with recognized international financial institutions, which originated in the last quarter of 2025 and mature in the first quarter of 2026, and an investment in money market funds of €359,869 thousand with an AAAM rating. At December 31, 2024, cash and cash equivalents included €450,000 thousand relating to time deposits held with a recognized international financial institution, which originated in November and December 2024 and matured in February and March 2025. At both December 31, 2025 and 2024, the remaining cash and bank balances were held in bank current accounts.

At December 31, 2025, 90 percent of our cash and cash equivalents were denominated in Euro (at December 31, 2024, 88 percent). The Group's cash and cash equivalents denominated in currencies other than the Euro are available mostly to Ferrari S.p.A. and certain subsidiaries which operate in areas other than the Eurozone.

A breakdown of cash and cash equivalents by currency is presented below.

	At December 31,	
	2025	2024
	(€ thousand)	
Euro	1,327,092	1,535,630
U.S. Dollar	75,125	107,871
Chinese Yuan	24,013	62,525
Pound Sterling	10,256	8,483
Other currencies	31,225	27,705
Total	1,467,711	1,742,214

Cash held in some countries may be subject to transfer restrictions. In particular, cash held in China (including in currencies other than the Chinese Yuan), which amounted to €24,726 thousand at December 31, 2025 (€63,379 thousand at December 31, 2024), is subject to certain repatriation restrictions and may only be repatriated as a repayment of payables or debt, or as dividends or capital distributions. The Group does not believe that such transfer restrictions have any adverse impacts on its ability to meet its liquidity requirements.

Cash collected from the settlement of receivables under securitization programs is subject to certain restrictions regarding its use and is principally applied to repay principal and interest of the related asset-backed financing. This cash amounted to €54,434 thousand at December 31, 2025 (€53,644 thousand at December 31, 2024).

Information relating to the short-term credit rating of the Group's cash and cash equivalents is presented below.

	At December 31,	
	2025	2024
P-1 / A-1 / Aaa-mf / AAAM ⁽¹⁾	49%	36%
P-2 / A-2	50%	59%
P-3 / A-3 / Not rated	1%	5%

Ferrari N.V.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(1) *Aaa-mf (Moody's) /AAAm (S&P Global Ratings) refer to money market funds. P-ratings (Moody's) and A-ratings (S&P Global Ratings) refer to the short-term rating of the financial institutions with whom the Group deposits cash in current accounts or other short-term instruments.*

At December 31, 2025, the Group's available liquidity, represented by cash and cash equivalents and undrawn committed credit lines, was €2,017,711 thousand (€2,292,214 thousand at December 31, 2024).

A breakdown of the Group's available liquidity is presented below.

	At December 31,	
	2025	2024
	(€ thousand)	
Cash and cash equivalents	1,467,711	1,742,214
Undrawn committed credit lines	550,000	550,000
Available liquidity	2,017,711	2,292,214

The undrawn committed credit lines at December 31, 2025 and 2024 relate to revolving credit facilities. For additional information, see Note 24 "*Debt—Committed credit lines*".

Notes to the consolidated statement of cash flows

Other non-cash expenses, net primarily include equity-settled share-based compensation, allowances for doubtful accounts of trade receivables and provisions for slow moving and obsolete inventories.

For information relating to financing cash flows relating to debt, see Note 24 "*Debt—Contractual undiscounted cash flows*".

33. SUBSEQUENT EVENTS

The Group has evaluated subsequent events through February 19, 2026, which is the date the Consolidated Financial Statements were authorized for issuance, and identified the following matters:

Under the common share repurchase program, from January 1, 2026 to February 13, 2026 the Company purchased an additional 276,643 common shares for total consideration of €82.0 million. At February 13, 2026, the Company held in treasury an aggregate of 16,921,249 common shares.

On February 19, 2026, the Board of Directors of Ferrari N.V. recommended to the Company's shareholders that the Company declare a dividend of €3.615 per common share, totaling approximately €640 million. The proposal is subject to the approval of the Company's shareholders at the Annual General Meeting to be held on April 15, 2026.
